

TOKYO REPORTS NEW ALLIED INVASION

TRUMAN GIVES
HIGHEST POST
TO STETTINIUSSECRETARY RESIGNS;
HEADS SECURITY
DELEGATION

BY ERNEST B. VACCARO
Independence, Mo., June 27 (AP)—President Truman announced today he had accepted the resignation of Edward R. Stettinius, Jr., as secretary of state, and was appointing him as American representative on the postwar security council and chairman of the United States delegation in its general assembly.

The president announced he would appoint a successor to Stettinius as state secretary next Monday or Tuesday, but laughed off attempts of reporters to make him say it would be James F. Byrnes of South Carolina.

Offer Accepted
He said Stettinius had accepted the offer of the job as United States representative in the League of Nations projected under the peace charter he steered through to approval at San Francisco.

It is, said the president, the biggest post in the gift of the government, and he didn't see how anyone could refuse it.

In a lengthy prepared statement read to a news conference in his home town here, the president announced he was accepting the resignation Stettinius submitted the day after former President Roosevelt's death, but which he refused at the time.

The statement, in the form of a letter to Stettinius asserted that he had asked him to stay on at that time to carry out a vital and important role as chairman of the United States delegation at the United Nations Conference.

Berlin Meeting Next
"You accepted that responsibility," the president wrote. "It was a very grave responsibility." He added:

"The San Francisco Conference has now fulfilled its purpose. The charter of a permanent United Nations has been written. You have every reason to be proud of your part in this achievement from the beginning."

The president's letter disclosed that he had "reluctantly agreed" to Stettinius' suggestion that he not accompany the president to the "big three" meeting near Berlin, which the president said "will take place next month."

Under questioning, the president said that Byrnes, former senator, war mobilizer and supreme court justice will attend the "big three" meeting as earlier announced.

"Will Mr. Byrnes go in a personal capacity?" the president was asked. He laughed and replied: Mr. Byrnes is going at my invitation.

Senate Gets Charter
The president said he would fly back to Washington Sunday, arriving there at 2 p. m. (Eastern War Time) if the "Sacred Cow" stays in the air, using the humorous name for the big C-54 luxury plane in which he has toured the country during the past several days.

He said he would formally submit the United Nations postwar peace charter to the senate Monday for its ratification but declined to say whether he would make a personal appearance.

The president emphasized that he wanted Stettinius to remain in Washington as his "personal representative," to be available to the senate "for whatever assistance

Weather

(Reported by U. S. Weather Bureau)

LOWER MICHIGAN: Partly cloudy, warm and humid with scattered thundershowers Thursday. Friday mostly cloudy with scattered showers and thundershowers. Cooler north and west portions.

UPPER MICHIGAN: Cloudy with showers and thundershowers Thursday. Friday cloudy and cooler with showers in east. Moderate southerly winds becoming northerly Friday.

All Of Luzon
Is Liberated

Manila, Thursday, June 28 (AP)—The entire main Philippine island of Luzon, which Gen. Douglas MacArthur reinvaded Jan. 9, "is now liberated," headquarters announced today.

Reporting complete conquest of the Cagayan valley, today's communique added:

"The entire island of Luzon, embracing 40,420 square miles is now liberated."

"The Americans have made a juncture in the valley of northern Luzon 'securing the entire

RYUKYUS COST
U. S. 9,731 MENStilwell Arrives On
Okinawa As Head
Of 10th Army

BY LEIF ERICKSON

Guam, Thursday, June 28 (AP)—The Ryukyus campaign cost the U. S. Pacific fleet 9,731 officers and men killed, missing and wounded.

Fleet Adm. Chester W. Nimitz today announced these figures for the navy for the period March 18 to June 20, inclusive:

Killed and missing, 4,907.

Wounded, 4,824.

This was an increase of 1,290 for the four weeks from May 24, last announcement of fleet casualties, through June 20.

Nimitz's report through May 24 listed 4,270 naval personnel killed or missing and 4,171 wounded.

Most naval casualties were suffered aboard ships sunk or damaged in Japanese aerial assaults on forces lying off Okinawa to protect ground forces.

Nimitz's communique has disclosed that a total of 33 ships—all of destroyer size or smaller—were damaged since March 18 in the entire Ryukyus and supporting operations.

Gen. Joseph Stilwell made his first appearance on Okinawa as commander of the 10th U. S. Army today and Japan awaited the next move by American forces that conquered the strategic island only 325 miles south of Kyushu.

Air Crewmen Bitter
As Pacific Missions
Are Increased To 35

Milwaukee, June 27 (AP)—Bitterness exists among American Superfortress crewmen still flying against Japan after having already completed 30 missions, Robert J. Doyle, Milwaukee Journal correspondent, said today in a dispatch to his newspaper from Saigon.

The principal complaint of the enlisted crewmen, Doyle said, is that some of the original crews which flew the first B-29 missions against Japan were sent home after completing 30 missions while the rest of the old crews were told they must fly 35.

Doyle said he was told by Brig. Gen. Emmet (Rosie) O'Donnell, commander of the 73rd bomb wing, that some original crews must fly more than others because sufficient trained replacements were not yet available and if all original crews were relieved after 30 missions even more planes would be idle at a time when every effort is being made to step up the Superfort program.

"Hey Harry" Grins
As Old Home Town
Shouts Welcome

Independence, Mo., June 27 (AP)—President Truman came back home today to a welcome he will never forget from thousands of Independence and Kansas City neighbors who shouted, "Hey Harry" until their throats were hoarse.

His grey head bared to the summer sun, the home town boy who went to the White House acknowledged greetings with a happy wave of his hand.

Standing in the rear of his open car, a grin on his face a mile wide, he rode like a conqueror through the streets so familiar to his earlier struggles as a farmer, soldier, haberdasher and smalltown politician.

Throughout the 18-mile ride from the airport to the two-story white frame little white house where Mrs. Truman awaited him the crowd waved and called him Harry.

His daughter Margaret boarded the presidential plane when it landed at 1:30 p. m., Central War Time, after waiting for nearly an hour the arrival of her "dad." His brother, J. Vivian Truman, rode beside the president and his daughter.

The president was pretty well fagged out by the time he reached his recently-remodeled summer White House, from the terrific heat and the glare of the sun on his deeply-tanned face.

Presidential Secretaries Matt Connelly and Charles G. Ross, George E. Allen, Washington, D. C., insurance man and close friend of the president; Senator Magnuson (D-Wash.) and others in the official party were invited to come in for a cold drink.

It was the third parade for the president this week. He was cheered by thousands at Portland, Oregon, Monday on a 90-mile tour through the city, and flew into San Francisco to receive a thunderous welcome from upwards of 250,000 persons that afternoon.

CONGRESS SETS
UP FOOD CZARAgriculture Secretary
To Get More Powers
Over Pricing

Washington, June 27 (AP)—Congress today prepared new powers and duties for Clinton P. Anderson, instructed Anderson to provide periodic reports on the nation's food supply after he becomes secretary of agriculture.

A senate-house conference group agreed to include what Anderson wants on food pricing in legislation extending price controls one year beginning July 1—the same day the New Mexico representative succeeds Claude Wickard in the cabinet.

There were these other developments on the food front:

(1) A house sub-committee, reporting critically on an investigation of the War Food Administration, instructed Anderson to provide periodic reports on the progress of "remedial measures."

(2) The house tentatively approved an allocation of \$174,500,000 for OPA for the fiscal year starting July 1. A move by some Democrats to boost the figure \$6,000,000 was defeated 93 to 47, when Chairman Cannon (D-Mo.) and other appropriators committed members declined to support it. Republicans did not make an expected attempt to reduce the amount, which is \$11,200,000 less than last year's allocation.

The new food pricing proviso requires approval of the secretary of Agriculture on all OPA price orders on processed foods and agricultural commodities including wool and cotton. This would require his approval on meat pricing.

Senator Wagner (D-NY) told reporters the new proviso, still subject to formal ratification in both branches of congress, makes Anderson "the first man" on food pricing.

Walkout At Hudson
Plant Is Settled

Detroit, June 27 (AP)—A strike that made 11,500 Hudson Motor Car Co. employees idle was settled tonight as Governor Harry F. Kelly of Michigan appealed to Detroit's labor unions to end jurisdictional disputes affecting more than 40,000 other workers.

The governor, in a statement at Lansing, the state capital, urged a return to work "for the good of Michigan now and in the postwar world."

Production of parts for B-29 Superfortresses and Curtiss Hell-diver bombers had been halted by the Hudson walkout which climaxed a dispute over job assignments. Details of the settlement were not disclosed but a Hudson spokesman said the men agreed to return to work on their regular shifts tomorrow.

General Of 15th
Popular Writer
With Boys On KP

Wiesbaden, Germany, June 27 (AP)—Lt. Gen. Leon G. Seiwald, 15th army commander, Lt. Gen. Leonard T. Gerow, writes the most beautiful prose:

"Pull our G's off K. P. (kitchen police) duty. Hire all the civilian help you need. Let our men sit at tables and let the Germans wait on them."

World War I veterans have responded to the call, Kelly reported. He said many "are cashing in their adjusted service bonds which matured in these 'E' bonds. One bank in Detroit today sold over \$150,000 of 'E' bonds to these veterans."

The governor asked that "Those who have not joined the ranks do so within the next 72 hours to insure a Michigan victory in this war loan."

Carrier Bunker Hill
Survives Jap Blow
With 656 Casualties

Washington, June 27 (AP)—Japanese suicide planes scored two direct bomb hits on the carrier Bunker Hill, causing 656 casualties, but the flagship of Vice Admiral Marc A. Mitscher survived four hours of flaming death and will fight again.

The navy disclosed today that the Bunker Hill, despite losses of 373 dead, 19 missing and 264 wounded in the tragic episode off Okinawa May 11, is home under her own power for repairs at the Puget Sound navy yard.

A daring maneuver which literally flung the fire from her hangar deck capped the heroic efforts of her crew and assisting ships to conquer the flames.

Fire Rages For Hours
Three hours after the attack, firefighters were still waging a nip and tuck battle in the flaming deck.

Tons of water, poured on countless thousands of gallons of flaming oil and gasoline, were forcing the firefighters back against the bulkhead. The sheer weight of the water was causing a six degree list in the ship. Below decks men were dying from heat and suffocation.

The cruiser Wilkes-Barre, a member of the task group, had come alongside, placing her bow hard against the Bunker Hill's starboard quarter, to add her hose to the firefighting. With the Wilkes-Barre at her side, the Bunker Hill went into a wide, 70 degree turn at 2 1/2 degree rudder. In turning, the navy account said, she shifted the load of water across the ship and "dumped the heart of the roaring inferno on her hangar deck out into the sea."

"Men with lips too burned to cheer rushed forward with their hose," the navy related. "Fresh air whipped across the deck at their backs, forcing the heavy smoke of burning oil and gas away from them. New life breathed through the ship. Men who were lying on blistering hot decks below knew, even as they drew their first breath of fresh air, that some miracle had saved them. They knew, too, that the Bunker Hill would live to fight again."

Commodore A. A. ("31 Knot") Burke, chief of staff to Admiral Mitscher, said the admiral was in flagplot when the attack came and escaped unhurt, although three officers and 11 men of his staff were killed and about 20 officers and men were wounded or overcome by smoke.

Admiral Loses Clothing
Admiral Mitscher transferred his flag to another carrier after the ship was saved. Fire destroyed all of the admiral's clothing except what he wore.

The 27,000-ton Essex class carrier was a proud veteran of every Pacific invasion and campaign since the opening of the central Pacific offensive more than a year ago. Many of her planes were

Generalissimo Chiang Kai-shek's soldiers battled into western suburbs of the former U. S. 14th Air Force base in a swift thrust through Japanese defenses that wiped out 100 Japanese defenders, the Chinese high command said.

Northwest of Liuchow, enemy troops and gun positions were heavily pummeled by P-51 Mustang fighter-bombers of the 14th Air Force, an American communique said, while the Japanese-held strongpoints of Luchai, 27 miles northeast, and Tawan, 29 miles south, also were blasted.

Only Remnants Left
In Japanese Fleet

Washington, June 27 (AP)—Rear Admiral Forrest Sherman, deputy chief of staff to Fleet Admiral Chester W. Nimitz, today presented this official navy estimate of what the Japanese have left in surface ships:

Two partially converted battleships, half old battleship and half carrier, the Ise and Hyuga; the battleship Nagato, roughly equivalent to the U. S. West Virginia, commissioned in 1923; two other old battleships not in commission; a small number of aircraft carriers which are moored alongside docks under camouflage; approximately 30 destroyers and a "few" cruisers.

Among the carrier strength, he said at a news conference, are two or three fairly large carriers not ready for service.

Sherman said the Pacific naval forces "would like nothing better" than for the remnants of the enemy fleet to attempt a "suicide" attack.

The failure of cutbacks to show up on steel mill order boards has so alarmed WPB, however, that Chairman J. A. Krug has sent letters to 800 war plants asking that they cancel their priority orders for metal when their war contracts are trimmed down.

Sales Of E Bonds
Spurt In Michigan,
May Attain Quota

Lansing, June 27 (AP)—Michigan's sale of \$1,000 "E" bonds during the week have shown such an increase that there is hope the state may reach its quota before the end of the Seventh War Loan drive, Governor Kelly said today.

The governor reported that a state-wide survey showed that since he issued an emergency proclamation Sunday "our people have responded with spirit and determination," and that "Monday and Tuesday state-wide sales of the \$1,000 'E' bonds have increased ten-fold over average daily sales preceding the proclamation."

He said that "This is the difference between a glorious achievement and a dismal failure."

World War I veterans have responded to the call, Kelly reported. He said many "are cashing in their adjusted service bonds which matured in these 'E' bonds. One bank in Detroit today sold over \$150,000 of 'E' bonds to these veterans."

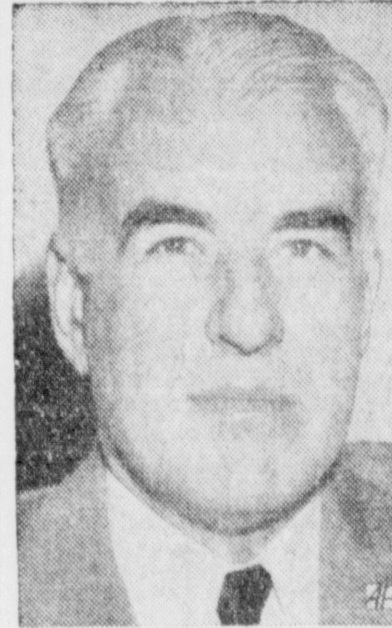

The governor asked that "Those who have not joined the ranks do so within the next 72 hours to insure a Michigan victory in this war loan."

EDWARD R. STETTINIUS, JR.

GETS NEW JOB—The resignation of Edward R. Stettinius as secretary of state has been accepted by President Truman, and the retiring cabinet officer has been appointed as American representative on the postwar security council and chairman of the United States delegation in its general assembly. The position is the biggest in the gift of the government, according to the President. A new secretary of state will be named next week. (AP Photo.)

DELAY GRANTED
McKAY HEARINGProsecutor Says Sinus
Operation Was Trick
To Gain Time

BY ROBERTA APPLEGATE
Lansing, June 27 (AP)—The examination of Frank D. McKay of Grand Rapids and seven other persons accused of a liquor graft conspiracy today was adjourned until July 5 because McKay still is in an Ann Arbor hospital recovering from an operation for a sinus infection.

Special Prosecutor Kim Sigler, opposing a request by McKay's counsel that the examination be continued until July 17, charged that "the whole business need not have been done, and it was done for the sole purpose of obtaining a delay."

Circuit Judge Leland W. Carr, whose one-man grand jury issued the warrant June 16, in setting the new date for the lower court examination said he was "reviewing the situation as it is, without reference to the motives or purposes involved."

Raymont Paul, appearing for McKay, presented an affidavit from Dr. Albert C. Furstenberg of Ann Arbor that McKay had made arrangements for the operation on June 15, the day before the conspiracy warrant was issued, and that he would be "totally disabled" until June 30. He was operated on at St. Joseph's Mercy hospital in Ann Arbor June 20.

Severe Hail Storm
Hits Detroit Area;
Windows Are Broken

Detroit, June 27 (AP)—Considerable damage was caused in the Detroit area tonight by a brief but severe hail storm.

Many trees were blown down and a number of windows were broken by hail stones. One greenhouse was reported to have had 200 windows smashed.

Twelve-year-old Melvin White of suburban Ferndale was struck by lightning while riding his bicycle during an electrical storm which preceded the hail. He was taken to Ardmore hospital in Ferndale.

In the same vicinity some 25 high tension lines were reported down, while at nearby Berkeley a two-family home was set afire by lightning.

Downtown Detroit and the western part of the city escaped the storm, which struck from about 8:20 p. m. to 8:55 p. m. (EWT). Damage was reported, however, in Highland Park, Royal Oak and Huntington Woods.

Liberators Sink
Ships Off Honshu

BY ROBBIN COONS
Guam, Thursday, June 27 (AP)—Navy search Liberators attacked shipping off the coast of Honshu yesterday in quick follow-up strikes to the B-29's 550-plane demolition raids on eleven Japanese industrial and ordnance plants.

The Liberators, from Fleet Airwing 18, sank a trawler and damaged a small cargo ship, raising to 36,000 the tonnage of Japanese shipping sunk by this Marianas-based air wing since April 23. These Liberators also have shot down 17 enemy aircraft.

Medium Mitchell bombers of Okinawa-based Fourth Marine Aircraft Wing ranged almost to Tokyo to score rocket hits on two medium cargo ships. They exploded one. Planes of the same wing also struck Japanese bases in the Marshalls and Palaus.

LANDINGS ARE
PREDICTED ON
CHINA COASTKUME ISLAND NEAR
OKINAWA CLAIMED
BATTLE SITE

San Francisco, June 27 (AP)—Radio Tokyo reported without confirmation today that Allied troops had landed on Kume Island, about 50 miles west of Okinawa, and that heavy fighting was in progress.

This unsupported claim, broadcast to American areas, was mixed with other invasion prattle which included a prediction of an American landing on the China coast and reiteration of reports that Allied invasion forces had struck about half way between Okinawa and Kyushu, probably a reference to the Amami Islands.

The terse report of the Kume operation said it was made Tuesday morning (Japan date) and referred to it as a "fresh landing." It added that the island's garrison "intercepted the enemy and heavy fighting is now in progress."

Balikpapan Shelled
Kume is due west of Naha, capital of Okinawa, its occupation would expand the American hold on the Okinawa area and protect the western flank of the Yank occupation forces on Okinawa. Kume is a small island, shaped like a dog's head, with an area of about ten square miles.

Radio Tokyo continued its reports of nearly two weeks running that an Allied invasion fleet was operating off the refinery center of Balikpapan. It said the "enemy warships" are taking an extremely cautious method of operation, and they continued to shell the area and that mine sweeping operations in the bay still were under way.

First confirmation of the Tokyo reports that Balikpapan had been shelled came in a delayed dispatch from Nathan Broch, correspondent for the official Dutch news agency, Aneta. He flew over the area in an Australian heavy Liberator bomber and reported under date of June 19 that the oil center had been subjected to a heavy air and sea assault.

The prediction that the China coast might be invaded came from the Tokyo newspaper Yomiuri Hochi. Domei quoted the editorial as saying, "The possibility is great that the enemy will attempt a landing on the China continent in preparation for the actual invasion of Japan."

AUSSIES EXPAND
Manila, Thursday, June 28 (AP)—Australian forces on western Borneo are expanding their gains in the Brunei Bay area, today's headquarters communique announced, as well as in the Seria-Miri oil fields area to the south.

There was no mention, however, of an Allied invasion fleet hammering at Balikpapan, oil refining center on the southeast coast of the island, as reported by Radio Tokyo.

In the Brunei area, Aussie ground troops moved into Beaufort, railroad terminus. This completed consolidation of defenses north of Labuan Island, securing the northern flank against attack by enemy forces that may be based at Jesselton.

For the past week patrols probing tidal streams had advanced slowly on Beaufort, cutting its rail line two and a half miles south of the town. Beaufort is a rubber export center.

Down the western coast, units of the Ninth Australian division occupied Kuala Belsit, seven miles south of Seria. It is the river port for the Seria fields.

Heavy and medium bombers and fighter units, supporting the Borneo operations, made medium and low level attacks on the Balikpapan area. More than 200 tons of bombs were dropped, destroying gun positions and starting large fires. Personnel areas at Tandoon, to the southwest, also were bombed.

FUTURE OFFERS MORE HOUSING

But Postwar Homes Are Not Going To Be Revolutionary

By FRANK CAREY

Washington—Prefabrication is expected to play its part in post-war residential building construction.

Don't look for screwy designs on the landscape.

"Prefabrication will not bring about any immediate or revolutionary changes in the appearance of low-cost housing to which it will be chiefly applied," says a report made public by the Senate's Kilgore subcommittee on war mobilization.

The report, discussing some 1,400 wartime technological developments and looking ahead to some of the possibilities of the postwar world, was prepared for the subcommittee by the Bureau of Labor Statistics.

After the war, says the report, a large volume of residential building construction is confidently expected.

"Prefabrication will doubtless be used more than before the war, although the industry is as yet too small, and marketing methods too undeveloped, to permit more than a small proportion of early postwar work to be handled by this technique."

Same Technique

Pointing out that prefabrication has been applied in the construction of many wartime emergency housing projects, the report says:

"Most of the wartime prefabrication work has been confined to panels for houses not differing radically in construction from the conventional pre-war types, and most of the immediate postwar operations are likely to be similar."

"There may also be increasing production of packaged units for heating, bathroom, stairway, windows, etc. Such houses will probably find more ready acceptance than those embodying radically new features of design and construction such as were formerly associated with prefabrication."

The report also says that if the market for prefabricated houses gradually grows, "a considerable reduction in the cost of small houses may be effected, while the relative ease of dismantling and moving some types may contribute to a fairly high resale value."

New Materials Coming

What else is in prospect for postwar residential construction?

The framers of the report, who combed through all available literature on wartime and possible postwar housing, contend that "relatively new materials may be used to a greater extent" in the building of the postwar home.

They pointed out that metals can now be bonded to wood or glass by special techniques; so can glass be bonded to wood or plastics.

Plastic sheets can be veneered on plywood for wall finishes. Cement asbestos board, gypsum board and other materials have come into use as insulation, as plaster substitutes or a sheathing.

LEAF RUST HITS WHEAT FIELDS

Heavy Damage Reported In Oklahoma-Texas Region

Washington—Wheatfields in Oklahoma and Texas are taking a terrific beating leaf rust disease, reports Dr. K. Starr Chester of Oklahoma Agricultural and Mechanical College, speaking on behalf of the American Phytopathological Society. This fungus, which is distinct from the species that causes black stem rust of grains, survived a mild winter and turned up on winter-wheat leaves 17,000 times more abundant this year than it was in the light rust season of 1944. Many thousands of acres of wheat in the Southwest have been given up as lost by the farmers; they have cut what is left for hay or plowed it under in preparation for a summer crop.

Dr. Chester fears that the rust spores, swept forward and eastward by summer winds, may spread eastward to the great grain areas still unaffected. His view, however, is not shared by scientists of the U. S. Department of Agriculture here. They point out that the principal winter-wheat areas from Kansas northward are already well headed and approaching the ripening state. The long, cool spring held back the development of both leaf and stem rusts, and while low temperatures have also slowed the growth of winter wheat to some extent, nevertheless the wheat has kept ahead of the fungi and seems now to be in fair position to finish several lengths ahead in the race.

It is still too early to state what may be the effects of a spread of leaf rust on spring wheat, they state. However, in the main spring-wheat areas the varieties sown this year are resistant to known strains of both leaf-rust and stem-rust fungi.

Bright Thought

Skegness, Lincolnshire, England—(AP)—Skegness, remembering how its streets were lit up by searchlights during air raids, is thinking of using this form of lighting instead of gas lamps.

Try mixing tomatoes and celery occasionally.

FLOUR SHIPPED IN SEALED TANK

Filled And Emptied By Pipelines Without Other Handling

New York—Flour for bakeries is now transported from mills in bulk, in giant sealed tanks mounted on flat rail road cars, three to a car. The tanks are filled and emptied through pipelines by air pressure without other handling.

Greater economy in handling and transportation is one result of the new method, but more important is greater sanitation. Moisture, dust and vermin cannot get into the flour during loading, on the road in the sealed tanks, or in unloading. The method will probably come into wide use in postwar days for baking establishments that buy flour in 25,000-pound lots.

The new system is a development of the National Fitch Corporation here, which functions as a research and sales division for specialized railroad equipment. Together with the tank is a one-man conveyor mechanism for transferring the tank to a truck-trailer for transportation to bakeries that do not have railroad sidings. The unloading equipment is made by the Fuller Company of Catonsville, Pa., which manufactures suction devices for handling grain and granulated products. It draws the flour directly into the receiving bins in the bakery, regardless of where they may be located.

When the tank of flour has to be transferred to a truck, a special conveyor platform is mounted on the trailer that works in conjunction with a similar conveyor under the tank on the car. A special 110-volt direct generator, mounted on the truck and powered by the truck's engine, furnishes the electricity to operate the conveyor motor. The truck is parked parallel to the car, connecting hoods put in place, the generator started, a button pushed, the motor turns and the tank is transferred in 90 seconds.

Future Presents New Prospects For Living

By FRANK CAREY

Washington—Dresses made of aluminum mesh . . . Bathrooms made of plywood . . . Transparent refrigerators made of plastics . . .

Automobiles with magnesium engine and body parts . . . Such visionary products of the post-war world are either in the design or experimental stage, or they're being talked about as possibilities.

But the extent to which they might come into use depends upon various factors. Not the least is the dollar sign.

Discussion of the post-war outlook for such war-developed materials as plastics, aluminum, magnesium, plywood and synthetic rubber, is contained in a report made by the Department of Labor's bureau of statistics to the Senate subcommittee on war mobilization.

The latter group, a branch of the Senate military affairs committee, described the report as "the first comprehensive statement of wartime developments."

"The extent to which these new materials will be generally adopted is difficult to foretell," says the report.

"It is apparent that many of them will find larger markets than in the pre-war period, but it is also virtually certain that not all of the facilities built during the war for the production of these materials will be needed.

Comparisons of costs of various materials, which have not been of the greatest significance during the war, will again become important when peace returns."

And the report adds: "The costs of production for these new materials will be influenced not only by purely economic factors but by many political considerations."

"Of primary importance will be the policies followed in the disposition of government-owned facilities. For some materials, notably synthetic rubber, much will depend on the policies adopted with respect to foreign trade."

"Many of the new materials will compete with each other as well as with older materials for particular uses—for example, plastics, aluminum, magnesium, and plywood."

The Labor Department's glance into the future was part of a comprehensive study of some 1,400 technological developments made in various fields during wartime.

Of plastics, this picture was given: "Special qualities of plastics, such as transparency and resistance to chemical action, will fit them for varied uses in industry, the laboratory and the home. Continued use of plastics for structural parts and other articles in aircraft and automobiles is expected."

And years after the war, we may even see automobile bodies made entirely of plastics.

On the other hand—"The future of the plastics industry will be governed largely by economic factors," says the report. "The price per pound of most plastics remains higher than that of many materials with which plastics compete."

"Despite the fact that articles of plastics are usually lighter than those of metal and that economics may be affected in fabrication, the price differential between plastics and, for example, steel is so great as to discourage large-scale substitution."

"There nevertheless remains a multitude of applications in which plastics are highly economical, because of special properties not

elsewhere attainable or because of great savings in fabrication time and costs.

The report points out that the production of aluminum and magnesium expanded tremendously during wartime and says both materials may come into greater use in the future.

While the annual production of magnesium before 1939 was 4,000,000 pounds, production in 1943 was 368,000,000 pounds and the nation has production capacity for much more.

Indicated uses for aluminum, the report says, are for buses, automobiles, passenger ships and for the manufacture of household appliances, furniture, bicycles and burial caskets. But most uses, it adds, "are contingent upon a suitable adjustment of the price of aluminum relative to that of stainless steel, plastics, magnesium or other competing materials."

Designs have been prepared for automobiles with much aluminum in engine and body, "but the large scale application of these designs will probably have to await further development of inexpensive mass-production methods of working with the metal."

The outlook for plywood in the post-war world "is promising," says the report, but it, too, will have to cope with competition."

Among possible uses are private airplanes, lightweight box-cars, prefabricated chicken houses and automobile bodies.

Morgenthau Next To President As Stettinius Leaves

Washington, June 27 (AP)—Secretary of the Treasury Henry Morgenthau, Jr., came next in line for the presidency today as the result of the resignation of Secretary of State Stettinius.

The presidential succession law of 1886 provides that in case of the death or "inability" of the president, vice president, and secretary of state, the presidency shall pass to the secretary of the treasury.

Morgenthau will be next in line until a successor to Stettinius is appointed and takes office. Meanwhile Undersecretary of State Joseph C. Grew will serve as acting secretary of state.

President Truman has recommended that the 1886 law be changed to put the speaker of the house next in line after the vice president. Legislation embodying this proposal was approved by the house judiciary committee today on a 10 to 9 vote.

France And Spain In Serious Mixup; Trade Is Cut Off

Paris, June 27 (AP)—All commercial relations between France and Spain have been halted completely, it was learned tonight, and diplomatic relations between the two countries have grown more tenuous.

The French News Agency announced that negotiations for renewal of a 40,000,000 peseta loan Spain granted to France in 1943 for purchases there were suspended by the Spanish following the Chambery incident in which a train carrying repatriates en route to Spain was attacked by a crowd of Frenchmen.

Madrid next closed the frontier to exports and imports between the two countries. Since then, both countries have suspended the granting of export and import licenses including permits for transit through the two countries.

Carrier Bunker Hill Survives Suicide Attack

(Continued from Page One)

aloft, supporting ground force advances on Okinawa, when the single engine Japanese fighter, a "Zeke," sneaked in low and fast on the starboard quarter. While still aloft, the plane dropped a 500 pound delayed action bomb and then itself crashed among 34 planes parked on the flight deck preparing to take off.

The crash started large fires among the parked planes, before the suicide plane itself skidded over the side. The bomb went through the flight deck and out the side of the ship, exploding in the air before it hit the water.

About 20 second later a "Judy" single-engine dive bomber sped in from the stern. Despite hits from the carriers AA batteries, it launched a 500 pound bomb which crashed through the after flight deck and exploded in the gallery deck below. The plane crashed into the flight deck at the base of the island.

Commander Burke said two other planes dove for the ship, but missed.

Explosions Shake Deck
The men of the Bunker Hill immediately turned to the task of saving their ship. Fires and exploding ammunition swept the flight deck where pilots and crewmen had been caught in their planes, but most of them escaped. Below, where the second bomb went off, the hangar deck quickly became a furnace fed by gasoline from several fuel lines and exploding ammunition from parked planes.

Despite intense heat and suffocating smoke, men stood by their posts to ward off further attacks while firefighters fought the flames.

"There were so many acts of outstanding heroism, it would be impossible to praise anyone over another," said Capt. George A. Seitz, 618 "A" Ave., Coronado, Calif. "I'm proud of every man who performed his assigned duties, and words can't express our indebtedness to those gallant men who died at their posts below decks. They kept the boilers going and the pressure in the fire mains."

He recommended 280 of his officers and men for awards.

Early in the ship's fight for life, the Wilkes-Barre and the destroyers Stembel, Charles S. Sperry and English moved in to add their hose to the fight.

Mass Of Wreckage
Lt. James F. Burgess, Pleasant Garden, N. C., was in charge of after air defense during the attack. He not only supervised gun crews and ordnance repair, but

led firefighting parties into the areas swept by fire and burning ammunition.

The navy gave this picture of the ship after the fires were under control:

"Decks were warped and twisted. Gun galleries amidships on the port side had been virtually destroyed. Others on the starboard side had been smashed by the Wilkes-Barre when she came close aboard in her rescue role. One elevator, melted almost in two, hung down into the smoking and flame blackened hangar deck. The gallery deck, where pilots and aircrewmembers had sat for briefing that morning, was completely demolished. The flight deck erupted crazily toward the sky, a twisted mass of wood and steel. The island structure, which had been engulfed in flame after the second plane struck, was shambles of torn catwalks and mangled steel."

The Bunker Hill, built by the Bethlehem Steel Co., Fore River yard, Quincy, Mass., joined the Pacific fleet in the fall of 1943.

Crivitz Destroyed By Fire 4 Times

Crivitz, Wis.—The northern Wisconsin village of Crivitz is the fifth community center to be built on the same site. The first four were destroyed by forest fires. Crivitz is now one of the centers of north woods fire prevention.

Briefly Told

Board Meets Tonight—The Delta county board of supervisors will meet at the court house at 7 o'clock tonight in adjourned session. It is expected that at this meeting the board will hear a report from the equalization committee, establishing the valuations for cities and townships on which to base the county tax assessment.

Grange Meeting—The Victory Pomona Grange will meet this evening at Little River Grange.

Oldtime Dance—Another oldtime dance will be held at the Escanaba recreation center tonight with dancing from 9 to 12. Music will be by Ed Hendrickson's orchestra.

Toonerville Line Began In Fontana</

CUT CITY TAX RATE TO 13.12

Is Second Lowest Rate
Since 1922; Budget
Is Increased

The tax rate for the city of Escanaba for 1945 will be \$13.12 per \$1,000 of assessed valuation, a decrease of 84 cents per thousand under last year, according to figures reported yesterday from the office of City Clerk Carl E. Anderson. The 1944 city tax rate was \$13.96.

Although the city tax rate has been slightly reduced, the city's total assessed valuation as established by the board of review has been increased. As a result the city will receive approximately \$10,000 more in tax revenue for the city's 1945-46 fiscal year budget beginning July 1 than it received last year.

The city tax rate for 1945 includes the following items:

General city tax	\$10.52
Interest and sinking	1.34
Garbage	1.04
Municipal bond	.22

Total \$13.12

The total rate of \$13.12 per \$1,000 assessed valuation is the second lowest since 1922, when council-manager form of government was inaugurated. The lowest rate was \$12.65 in 1932.

Based on a valuation of \$9,222,515 for the city, the \$13.12 rate will bring the city \$120,000 in tax revenue for the new budget year. Last year the rate of \$13.96 on a valuation of \$7,916,462 brought the city tax revenue totaling \$110,000.

A. V. Aronson, acting city manager, has described the city budget increase for the ensuing year as due primarily to the following four reasons:

1—The granting of an additional \$6 per month bonus to city employees because of the increased cost of living. 2—Increased public works budget to purchase new equipment if wartime restrictions are lifted within the year, and to construct a new Danforth road to the ski hill road. 3—Increase in the forestry department budget to provide additional public service. 4—Greater consideration for recreational opportunities.

It was also pointed out by the manager that "there is the possibility that postwar work will start before the end of next fiscal year."

Work Progressing On Pier At Sault

Sault Ste. Marie—Work on a 1,200-foot pier extension to help steamers approaching and leaving the locks overcome effects of a current created by intake of the Michigan Northern Power canal is progressing on schedule. R. Beauvais, vice president of the Great Lakes Dredge and Dock company and project manager here said today.

Timber cribs forty feet wide, one hundred feet long and thirty-two feet high with pockets are being constructed to suppress the current. The cribs are to be filled with rock and sunk in approximately three hundred thousand f.b.m. of timber per crib and twenty-five tons of steel are being used in the construction. Twelve of these cribs are being built. After the cribs are built they are sunk in the water by aid of giant dredges. After the cribs are sunk, approximately seven thousand cubic yards of concrete cap are to be placed.

A breakwater of stone downstream of the proposed line of cribs is being built to cut off the current flowing into the power canal.

Approximately one hundred fifty men are employed working in shifts from 6:00 a. m. to 10:00 p. m. The entire project will cost about \$600,000. Work began on June 1 and will be completed by the end of October.

NO NAZIS IN REICH

Menominee—There are no Nazis now in recently Nazi Germany. Brig. Gen. Einar Gjelsteen of Menominee told Menominee Rotarians yesterday. Not many, anyway. While he was in Germany he met not more than two. This was General Gjelsteen's face-to-face observation on the German people's general disavowal of the Nazis and their works and refusal to accept responsibility for the war.

General Gjalsteen said that war damage in Germany varied greatly and was proportionate to the resistance offered land forces. Some strategic industrial targets were demolished by bombers before the land forces arrived.

General Gjelsteen commanded artillery of the 86th (Blackhawk) Division, activated in December, 1942 and one of the last divisions to go overseas to fight the Germans. It entered the line March 27th near Cologne before the Ruhr pocket and was in combat the following six weeks until VE-Day, serving with the 15th, First, Third and Seventh armies.

Munising News

Public Assistance Totals \$9,788 For May In Alger Area

Munising—During the month of May, Alger county individuals receiving public assistance were paid \$9,788.10 in federal and state funds. This represents \$7,854.70 paid to 276 recipients of old age assistance, averaging \$28.46 per person. Alger county ranks 5th in the Upper Peninsula in the amount of their old age assistance grants, according to a report by Miss Margaret Lipsett, county social aid supervisor.

Last month \$1,666.00 was received by 30 individuals for 77 children in the form of aid to dependent children. This averages \$55.53, and is about the 5th highest grant in the Upper Peninsula.

Eight blind people receiving aid were paid \$267.40 and the average grant paid to these individuals was \$33.43, which is the third highest among the fifteen counties of the Upper Peninsula.

During the coming months there will be a steady rise in the amount of average grants for these categories of assistance, because the amounts which are allowed for food and clothing have been increased and certain other items have been liberalized.

For example: It will be possible for old age assistance recipients, if hospitalized, or in private convalescent homes, to receive up to \$60.00 a month to apply on their bills. Ordinarily the maximum for old age assistance is \$40.00.

The maximum for an aid to dependent children family with one child has been increased from \$50.00 to \$60.00. This change will affect the majority of families receiving this type of assistance. It is now possible for a person residing out of the state to receive old age assistance from Michigan until they qualify for old age assistance in the other state in regard to residence.

PARKING BAN ENFORCED

A warning has been issued by Munising Police Chief Frank Chase in regard to parking in front of the theatre while a show is in progress. Motorists have been

disregarding the parking law, which is a state law, and the chief has announced that it will be strictly enforced by all members of the force hereafter.

CHARLES COLLINS

Funeral services for Charles Collins 38, who died suddenly at his home Monday evening, June 25, will be held this afternoon in the Beaulieu funeral home at 2 p. m. Services will be conducted by Rev. Malcolm Van Antwerp.

Escorts will be: Arthur Denny, Oscar Wing, George Schilling and William Trotter. Interment will be made in Maple Grove cemetery.

BRIEFS

Mrs. Arthur Kessler and children of Detroit are visiting at the home of her grandmother, Mrs. Metro Mickes.

Ralph W. Jackson returned home Tuesday from a weeks visit in Chicago.

Mrs. Fred Esis, who has been residing the past two months in New York, has returned home to make her home with her parents Mr. and Mrs. Charles Cook.

Mrs. William Watson, the former Betty Schilling, is arriving home Sunday from San Francisco to visit her parents.

Mrs. Elbin Strom and children have gone to Lower Michigan where they will visit relatives for two weeks.

Robert Davis has received an honorable discharge from the Army under the point system and has returned home from Hot Springs, Ark. to reside. He took part in the North African campaign and was in the Anzio invasion in Italy.

Mr. and Mrs. Fritz Oas and family of Wayne, Mich. have returned to Munising to reside.

Caused by Shortages

BLACK marketing is not the only wrongdoing that is resulting from the wartime shortages of meat and other necessities of life.

Farmers in the southeastern Michigan region report chickens are being stolen from their coops and even calves taken from the pastures. Even more serious are reports that Upper Peninsula farmers have found the carcasses of their high grade cattle lying in the fields with some of the choice cuts removed. Conservation authorities are also becoming alarmed over the threat to the deer herds if the current meat shortage continues.

American consumers may not be competent to pass judgment on the merits of Herbert Hoover's meat control program, but they know, out of bitter experience, that the time has come to tackle this problem diligently and earnestly. Mr. Hoover's 12 proposals are admittedly drastic and far-reaching. In favor of Mr. Hoover's plan, it may be said that it was used in the last war and that it worked. At that time the United States was able not only to feed itself but to render substantial assistance to the starving peoples of Europe. This year, on the contrary, there are local famines in many communities and there is less and less food to export to foreign countries.

Considering the nation's natural resources, there must be a cure for present conditions. Certainly there will be serious consequences if they are permitted to go on.

A King In A Stew

THE forced abdication of King Leopold of Belgium appears inevitable and may become reality even before these words appear in print. The people of Belgium have indicated that they have had enough of monarchy and particularly of Leopold, who sat out the war as a "guest" of Nazi Germany.

At least one other monarchy, the House of Savoy in Italy, is also in a hot seat, with growing demands for the abdication of King Victor Emmanuel, who collaborated at least passively, with Benito Mussolini and the German Nazis in a program that brought Italy to ruin.

As a method of government, monarchies have proved generally inadequate to meet the requirements of modern nations. Reigning autocracies, in fact, have entirely disappeared from the world and the nations that have continued to maintain royalty as nominal heads of government have done so merely to retain a symbol of their past.

Occasionally monarchists grow too big for their breeches, as King Carol did in Rumania, and attempt to impede the natural trend for democratic processes of government.

Too many nations, however, have made the tragic mistake of jumping from the frying pan into the fire, by kicking out their royalty only to let the reigns of government fall into the hands of dictators who are usually more despotic and certainly less democratic than the monarchists.

Americans who follow the trials and tribulations of other nations of the world in their attempts to maintain satisfactory governments, generally without success, have ample cause to rejoice that the United States government, through all its glorious history, is government of the people, for the people and by the people, the most truly democratic rule in the entire world.

Japs Are Still Tough

IT is characteristic of the British to give their enemies credit for whatever ability they possess. They are not inclined to underestimate the armed forces of the foe, but to study them and accept them for what they are. Then they try to find a way to overcome any advantages the enemy may have.

The recent appraisal of the Japanese soldier by Lieut. Gen. Sir William J. Slim, commander of the British Fourteenth Army in Burma, is in line with the British tradition. In an interview in London, General Slim said that every army in the world talks about fighting to the last man, "but the Japanese are the only ones who really do it." By way of emphasis, he added that British in Burma have killed 100,000 Japanese since October, 1943, while taking only 2,000 prisoners—only 500 of whom were able-bodied.

General Slim does not praise the Japanese army as such. He said it was not a very good army. And he termed the Jap a stupid little man. But the Japanese, he said, have that unlike quality where every individual soldier will go until he is killed. "You can stamp on them, but they still come on, like ants," he asserted.

Since General Slim's interview, the Japanese on Okinawa have shown more of a disposition to surrender to avoid death. The number is still only a small fraction of

those who fought until the end, however, and so we must resign ourselves to a lot of hard fighting before Japan is vanquished.

The Next War

PREDICTING the shape of the next war is a pastime long dear to the Jules Verne type of writer. Some have been far off the beam, but the better ones have only had to wait for time to catch up with them and prove at least the substantial truth of their fancies.

One of the more successful of these oracles is the Swedish engineer, Sven Lindequist, who foresaw a subatomic sphere bombing more than 20 years ago and, being a practical sort of prognosticator, designed one of the first high-altitude airplane engines.

The other day Mr. Lindequist ventured the prediction that guns would be obsolete in the next war. Their place would be taken by jet-propelled, radio-controlled bombs weighing up to 10 tons and capable of landing with precise accuracy from a distance of hundreds of miles.

These would be made in underground factories, Mr. Lindequist said, and fired from a camouflaged opening to the front lines. There they would be loaded with explosives and sent on their way.

Fantastic? Well, one might have thought so except that next day the papers carried a report from the U. S. Army Ordnance Department which gave sober credence to the Swedish engineer's prophecy.

The report, based on statements of captured Nazi scientists and on our own forces' observation, informed Americans that New York and other east coast cities had missed being targets of the German V-bombs by only six months. But for the crippling RAF raid on the V-bomb plant at Peenemuende in 1943, which killed hundreds of technicians and destroyed much experimental equipment, this country could not have escaped before Allied armies had smashed the Nazis.

As it is, the Nazis claimed that pinpoint bombing at 3000 miles would have been possible by November. Our intelligence officers have not denied the claim, nor do they seem to see anything outlandish in the Nazi boast that V-bombing at a range of 15,000 miles was possible and imminent.

So there is the next war. It will begin with a salvo of precision rocket bombs, sent from hundreds or thousands of miles at tremendous speed, striking without sound or warning, wiping out a whole city, perhaps, and most of its inhabitants.

Then will come retaliation. City after city will be leveled, more thoroughly than in this war. The surviving civilians will be in constant flight from the unseen—the explosives and, maybe next time, the gas and bacteria bombs. They will live underground in caves and shelters.

Does anyone think it impossible? Does anyone still want to talk about "inevitable" war with anybody? Does anyone think that all of us should not use what brain and persuasive strength we have to work for enduring peace?

Other Editorial Comments

"VINEGAR JOE"

(Science-Science Monitor)

General Stilwell knows too much about fighting Japanese to be kept at a desk job in Washington, no matter how important. And it is characteristic of "Vinegar Joe" that he would rather command one army in the field than be chief of all the Army Ground Forces. His assignment to command the Tenth Army means that even bigger things than Okinawa are in store for this unit. And the fact that the assignment came from General MacArthur instead of from Admiral Nimitz indicates that the Tenth Army will be enlarged and employed in large-scale land campaigns. It suggests also that the Third Marine Amphibious Corps may be retained under Admiral Nimitz's command for coming ship-to-shore operations which are predominantly naval in scope.

Take My Word For It

Frank Colby

PRAGUE

(Scrapbook Item)

Strictly speaking, there is no such city in Czechoslovakia as "Prague." In the country itself, the name of the capital city is Praha, pronounced: PRAH-hah.

The German form of the name is Prag, pronounced: prahk; also: prahch, with the "ch" fricative sound as in "ach."

The spelling "Prague" is the French form. And in that language the pronunciation is: prag, the "a" being almost as flat as in "rag, tag."

"Prague" has become the standard spelling in Britain and America. The authorities list two pronunciations: prahg and prayg. The latter follows the familiar pattern of Hague, plague and vague, which always have the "ay" sound. Therefore, "prahg," though commonly heard, is a nonconformity, judged in the light of analogy.

However, analogy in English often leads to false conclusions. For example, the word ague, a kind of fever, does not conform with Hague, plague, vague. Ague is pronounced: AY-gew.

Another French loan-word is baguette, a ring. It, too, does not follow analogy, for baguette, in both French and English, is pronounced: bag.

To get back to the pronunciation of the name Prague. Of seven accepted American dictionaries, four list only: prayg. The only English pronunciation listed by the Encyclopaedia Britannica is: prayg. Prayg is the first choice of two American dictionaries, and the second choice of one.

As to "Koe-pen-HAH-gn" for Copenhagen, it has no sanction whatever. Copenhagen is the English form of the Danish Koebenhavn. Be sure to say: KOE-p'h-HAV-gen.

World Events Analyzed

BY MARQUIS CHILDS

Washington—It is not hard to see what a shortage of doctors, growing out of the shortsighted policy of selective service, will do to the health standards of this country. That is something everyone can understand.

Childs

Even more serious for our future as a nation is the gap in the training of our scientists and technologists which has resulted from the refusal of selective service to defer future scientists. What makes this harder to understand is the fact that it is American technology, as developed by American education and American industry, which has contributed so much to winning the war.

During the past 25 years, industry in this country has enormously expanded its program of research and technical development. Out of our industrial laboratories came the know-how which made mass production of weapons possible on a scale never before seen in the world.

But now men, new creative minds, must constantly be fed in from our technical schools. It is this source that has been dried up.

DEFERMENTS DISCONTINUED

In the spring of 1944, deferment for students in scientific fields was ended. Our military commanders said a temporary sacrifice was necessary for an all-out effort to end the war with Germany. They believed in September of 1944 that the European war would end by November 1.

General Marshall's recent statement on the Japanese war indicates the same policy will be followed in the Pacific—all out for a quick ending. Our generals could be wrong again. It's a big gamble with our national future.

A serious, sober body such as the American council on education does not deal in scare stuff. Yet the council recently had this to say:

"Technical skills and specialized knowledge require years of training. The leaders of five years and ten years from now should be in training at present. Instead, we have all but ceased our training in all the fields upon which our technological civilization most directly depends. The stoppage of the flow of young men into scientific and technical fields is a serious threat to the health, safety and welfare of the nation for the next two decades. None of our allies has made this mistake."

In England, at each university, there is an office known as a joint recruiting board representative of the university and the services. If the faculty recommends that a student finish his course, the board reserves him. As a result, England has had a steady flow of students in the sciences equal to pre-war years, and at least 50 per cent above in physics and engineering. The same is true in Canada.

SCIENTISTS ALMOST WON WAR

While information on Russia is scarce, all evidence points to a marked increase in scientific and technical training during the war. Research in pure science has gone on in Soviet laboratories without interruption. Let's not forget, in this connection, that German scientists almost won the war. German physicists and specialists in electronics developed through years of research the V weapons.

Maj. Gen. Lewis Hershey of selective service has said that the rate of induction into the army will be reduced by 30,000 a month, starting in July. In the light of this change, surely it should be possible to defer our scientists and doctors of tomorrow—only a small fraction of 30,000.

It is such shortsighted policy which raises doubts when our military commanders ask for universal military service for post-war America. It is one of the reasons why Congress may ignore their recommendation for compulsory training.

France in World War I narrowly won victory. France built the Maginot Line. The system of universal military training was extended. France was preparing to save herself not from the war that was coming, but from the war that had just been concluded.

Security in our age is so much more than masses of disciplined, drilled men. It is the laboratory. It is in industry. It is in the health of a people. No single formula can achieve it. It calls for creative imagination that can see around the mountain of tradition.

Gracie Allen Says--

Well, as if westbound traffic hasn't been heavy enough through this country, a big insurance company now advises girls to head west if they want to get married. When this gets around, there'll probably be a movement toward the Pacific coast that will make the California gold rush of '49 look like a Conga line.

And a word of warning to you western men. Lack of train space isn't going to stop those man-hunting women. They'll organize covered-wagon trains if necessary.

Only this time, instead of being pursued by the Indians, the womenfolk are liable to turn the tables and chase some of those handsome young Indian bucks right back onto the reservation. Yes, indeed, times have certainly changed.

An organization of vegetarians in Cleveland has disbanded for the duration. Maybe eating vegetables has become too common.

It's getting so we can't believe half the lies we hear from the captured Nazi high-ups.

There'll be 50 per cent less Pullman space for civilians in August. That ought to give you a pretty good idea of where you are not going on your vacation.

David and Goliath

Good Morning!

By The Bugler

CITY VIEWPOINT—Pete N. Logan of Escanaba, supervisor and city councilman, knows more about the insides of a railroad engine than a cow. Even Pete will admit this, for he can tell you that there are 22 electric motors on the North Western's "400" on which he is fireman—but he forgets that cows have to be milked every morning and evening.

This lapse on Pete's part came the other day as the county board was preparing to adjourn to 10 a. m. the following day. It had been a long day and the equalization committee wasn't yet ready to report, so an adjournment was necessary.

"Why not convene earlier than 10 o'clock?" Pete asked. "If there's a lot of work to do all of us could be here before 10 o'clock."

Supervisor Harry Greene of Garden immediately spoke up. "How many cows have you got to milk before the meeting? I get up at 5:30 every morning, but I still couldn't be here much earlier than 10 o'clock. It's a long drive."

Supervisor Harold Gustafson added his bit with the down-on-the-farm observation: "I've got to play with 10 of them every night and morning."

"Well," said Pete, as close to being squelched as he ever is, "we have to get the milking done," and sat down grinning.

FISHING HIGHLIGHT—At the Escanaba yacht basin a few days ago a fisherman was casting with experienced ability. All at once the line tightened. The fisherman began to reel excitedly. An audience gathered to watch the battle.

Slowly the fisherman brought the prize in, being careful not to give too much slack to the line. Then while the growing crowd of people craned its collective neck the fisherman hauled out an old evergreen tree.

The aide who to this story asked: "What would a Christmas tree be doing at the bottom of the yacht basin?"

The answer could be given by Swan Johnson, whose ice cutters last winter marked off the holes with evergreen trees stuck in the snow, so people wouldn't wander into them and get a ducking.

CONFUSION—Sgt. Phil Bruce

of the Escanaba police department has a way of giving tests for driving licenses that leaves the applicant thinking he—Phil—has eyes in the back of his head.

A part of the test is to have the applicant read a set of numerals and letters on a chart on the wall back of Phil's desk. Phil, of course, sits with his back to the chart, while the applicant faces it standing across the room. The test is to determine how good the vision of the applicant is.

"Just read the letters on the chart," says Phil, and begins checking the applicant's paper examination.

The applicant starts to read and then halts, because Phil isn't even looking. Told to go right ahead he finishes in a daze. How would Phil know if they were called right or wrong? That's easy. After all these years he has that chart memorized from beginning to end.

PUTS IT OVER—As Charles Hammar, Delta county War Loan chairman said the other day, the busy person is the one who can take on another job and get it done. When he said that he was

The Chinese Republic was founded in 1911.

INTO THE PAST

Ten Years Ago—1935

The bathing beach opens today as the official swimming season opens in Escanaba. The temperature has reached the 80's and many have already gone in for a first dip.

Shirley Pearson who was seven and her sister Betty who was five entertained at a birthday party Thursday afternoon. Among those who attended were Jean and Lucille Belanger, Lois Nelson, Lorraine Schils, Joyce Vogel, Grace Ann Peterson, Helen Johnson, Jean Smith, Barbara Duchaine, Jacqueline O'Donnell, Dona Wood, Elaine McMartin and Jean McPherson.

Manley Anderson, student at the Chicago Conservatory of Music, has returned home to spend the summer vacation.

William Warrington has returned from Detroit where he has been attending the Michigan Bankers' Association.

Twenty Years Ago

An earthquake was felt today in Montana. Although no deaths were reported three trains were blocked by a landslide and in most of the cities in that area buildings were reported to have cracked and streets and pavements were ruined by the quakes.

Miss Edith Norman has returned from Lawrence College where she is a student to spend the summer months at her home.

The Misses Marie and Martha Smith and their brother John returned to their home in Powers after visiting with their aunt, Mrs. Mayadore LaPlante.

Mrs. John McCay and two daughters have left for an extensive visit in Portland and in Canada.

thinking of Mrs. A. E. Johnson of Bark River, who was called on in an emergency to take over the Seventh War Loan campaign in her township. Her husband, who is War Loan chairman of the township, was ill at a hospital in Rochester.

Mrs. Johnson accepted the job. Her husband came home, still not well, so Mrs. Johnson besides taking care of her home also ran the Johnson's service station. In addition to these duties she and her committee put Bark River township "over the top" in the Seventh War Loan drive—the second township in the county to exceed its quota.

Bark River township had a quota of \$30,000 in "E" bonds. Its residents have purchased bonds totaling more than \$32,000 and the drive is still on.

GIRLS WILL BE GIRLS—The Escanaba police have had many requests for help, but they ran into a new one the other day. Two girls on their way to a girl's camp stopped at the station and asked the police to handcuff one of the girls to an officer. "You know, just as if she had been arrested," said her chum. Why? The girl wanted to have her picture taken to send it to her folks as a joke.

DEAR BUGLER—I would like to use your column as a means of expressing my appreciation to the War Price and Ration Board at Escanaba. My wife and I recently moved here from a large city, and we've had occasion since then to apply for kerosene, gasoline and tire certificates.

The board was always most courteous and prompt in its action. We appreciate its efficiency so much—especially in comparison with boards with which we have had the ill luck to deal.

We wish to thank them most heartily for all the kindness accorded us.

Sincerely,
"Proud to be Americans
and live in Delta County."
—Clint Dunathan.

The Washington Merry-Go-Round

By DREW PEARSON

Washington—Now that all the hullabaloo over Poland has subsided, inside diplomatic reports from Europe indicate that the Lublin-Warsaw Polish government is not going to be such a Russian puppet government after all.

Pearson

Or, as some neutral diplomats summarize it, "A Pole will always be a Pole whether he's in London or Lublin."

Illustrative of how the Poles are feeling their oats was a meeting which took place at Moscow last week regarding the Polish row with Czechoslovakia. The meeting was attended by Russian Under Secretary for Foreign Affairs Vyshinsky; also by Ex-Premier Mikolajczyk of the London Poles, plus Edward Morowski of the Lublin-Warsaw government.

Morowski, though supposedly a Soviet puppet, started the fireworks by ranting against the Czechs. He said the Czechs had no right to Teschen, a small coal-mining town which had always been Czech, but which the Poles snatched away from Czechoslovakia when she was powerless in Hitler's hands after Munich.

Soviet Commissar Vyshinsky emphatically differed with Morowski. He pointed out that the Poles have peaceful means for settling their disputes, should not use the aggressive tactics of the Nazis. Finally Morowski subsided.

SOVIET HOLDS SLIPS

Other uncensored diplomatic reports show that the Warsaw-Lublin Poles are getting tougher and more independent and that the Soviet grip is slipping. Here are some developments which, for some queer reason, have been hushed up by European censorship:

1. Twelve Catholic papers are now being published in Poland. (There has been considerable opposition to the Lublin Poles by Catholic groups, on the grounds that the church was being suppressed.)

2. The Warsaw-Lublin Poles have indicated they want an alliance with the United States and Great Britain just as strong as that with the Soviet. This, they say, would guarantee Polish independence.

3. Poles are already demanding that the Red Army withdraw from Poland; also, that the Soviet secret police withdraw.

4. The Lublin Poles also resent the latest Russian attitude of friendliness to the German people, which they criticize as a symbol of unprincipled Soviet bidding for German support in order to counter-balance the pro-Germanism of certain British leaders.

5. The Lublin Poles also resent Russia's opposition to Polish expansion in the northwest, where the Poles would like to take over the German city of Stettin.

6. Finally, the Lublin Poles resent the fact that the Russians now insist upon bringing outsiders into the Polish government—in line with the Hopkins-Stalin conversations. Stalin promised Hopkins to give Ex-Premier Mikolajczyk of London and other Polish leaders cabinet seats in the Lublin government, which means that some of the Lublin Poles will have to give up their cabinet posts. Naturally, they are sore.

So it looks as if the Polish puppet pot, which once boiled against the London exiled Poles, is now simmering against its friends in Moscow.

HANDS OFF CHURCHILL—One of the well-kept secrets of the last presidential campaign was a statement Winston Churchill prepared urging the American people to re-elect Franklin Roosevelt.

The statement, however, was never made public. Roosevelt heard what Churchill was planning to do and stopped it. He explained to the British Prime Minister that much as he appreciated his good intentions, the American people resented outside interference in their politics.

Undoubtedly Churchill was planning reciprocity for the help which Harry Hopkins had given him two years before. At that time, the winter of 1942, just after Pearl Harbor, Churchill faced growing criticism in Parliament.

So Harry Hopkins went to London and with Roosevelt's blessing dropped the word quietly in British political circles that the president of the United States appreciated the fine cooperation he was getting from the Prime Minister and would be sorry to see any change of British leadership.

Harry Hopkins was very open and above board about this and later told friends in Washington about the worry he and Roosevelt had felt regarding Churchill's tight political position.

A lot of water has passed down the Potomac since then, and today things are different. Today the White House is keeping strictly hands off the British election. In the first place, President Truman does not have President Roosevelt's intimate and personal friendship with Churchill. If anything, he is a little unsympathetic. Regardless of this, however, it is the belief of many American political leaders that it would be very unwise to dabble in British politics even in the most oblique manner.

Furthermore, there is a considerable body of opinion in the senate which has been quietly though definitely critical of Churchill's policies in Greece, Belgium and Italy, and which feels that Churchill has played the old British balance-of-power game to stir up trouble between the United States and the Soviet. Were a more liberal Prime Minister in office, many senators feel that our cooperation with both Britain and the Soviet would be easier.

Some folks still keep skeletons in the closet—others take them to the bathing beach.

3 PLEAD FOR CANAL SURVEY

Au Train Waterway Discussed At Hearing In Escanaba

Only three persons were heard at the hearing conducted in Escanaba yesterday morning on the proposed U. S. Army survey for the Au Train canal, and all were proponents of the scheme. The hearing was conducted by Col. Schenk H. Griffin, district engineer of the U. S. Army Engineers office in Duluth, and Col. McWeinert, district engineer of the U. S. Army Engineers office in Milwaukee. There were no representatives of transportation companies heard at the hearing here yesterday and no objectors to the proposed canal.

A second hearing will be conducted at Marquette today by Col. Griffin and Col. McWeinert and further testimony will be received there.

R. W. Nebel, Munising attorney, representing Alger county and the City of Munising, was the first witness heard yesterday morning. He proposed a canal route originating at Munising, instead of Au Train Bay, contending that the Munising harbor is well protected and is sufficiently large to accommodate a large fleet of vessels.

Handle 11,000 Tons
Nebel stressed the fact that 95% of the land along the proposed canal route is now owned by the federal government and the state government, or is under option by these agencies.

The Munising attorney declared that the proposed Au Train canal would handle an estimated 11,000,000 tons of shipping annually from Northern Minnesota and

Northern Wisconsin to the Chicago area. He declared that the proponents represented by him favor a complete preliminary survey.

He also presented a brief prepared by the Mississippi Valley association containing the endorsement of that agency for the proposed waterway.

William J. Miller, representing Delta county and particularly the Rapid River and Whitefish river area, declared that the most feasible route for the Au Train waterway would be from Au Train bay to Little Bay de Noc, and suggested a width of 200 feet and a depth of 25 feet for the canal. He said that the waterway would result in considerable saving in time and in costs for shipping to lower Lake Michigan and estimated that it would reduce the shipping haul 360 miles per trip.

Miller also contended that the Au Train waterway would provide a safer route that the present Soo canal because it would bypass the treacherous Whitefish Point rapids.

The Escanaba attorney further declared that the Au Train canal is an important national defense project, providing a secondary channel for the movement of ore to the steel mills. He pointed out the vulnerability of the Pennsylvania steel mills to attack and asserted that steel mills in the Chicago area would need a faster flow of ore in the event of damage to the Pennsylvania mills.

Would Develop Power
The supplies of high grade iron ore are rapidly being depleted but great quantities of low grade ore still are available in this area.

Miller said. The present shipping costs are too high for the use of low grade ore, he added. He said that the water power developed by the project also would make available the quantity of electricity needed to process the low grade ore.

Finally, the proposed St. Lawrence waterway, if it becomes reality, would increase the shipping traffic at the Soo, making an alternate route for the diversion of some of the shipping now handled at the Soo locks, he said.

The third and final representative to be heard was Leslie D. Goddard, representing the City of Gladstone. Goddard said the route from Au Train Bay to Bay de Noc would require the least excavation from an engineering standpoint but conceded that a large breakwater would be required there to shelter the harbor. The route would traverse an area that would require considerable limestone excavation, he said.

Goddard said a low level canal would be too costly to construct and spoke in favor of a high level water route. He said that about 25% of the shipping now going through the Soo locks would use the Au Train waterway to Chicago and lower Lake Michigan ports.

PICTURES RETURN
London—(AP)—For the first time since September, 1939, some of the National Gallery's best pictures are back on display. They have been brought back from a cave near Blaenau Ffestiniog, South Wales, where they were taken for safekeeping during the war.

CHILDREN WILL BE CONSIDERED

Houses Of Tomorrow To Take Care Of Needs Of Youngsters

By ROSELLEN CALLAHAN
NEA Staff Correspondent
New York—The house of tomorrow will be built around children's needs, according to a cross section of the latest architectural thought.

Typical of this new trend in planning children's activity areas in the center of the house, is the design by L. T. Charles D. Wiley, of Washington, D. C., first prize winner of the Annual Small House

Competition.
In explaining his theory of an "activity center," Lieutenant Wiley says:

"Here children can play without disturbing the rest of the household. This room need not be fixed up or cleaned up to be presentable to guests because it's the heart of the house, and you don't have to show everyone this part."

Adjustable Bedrooms
Lieutenant Wiley's plan also allows for flexibility of sleeping rooms, so that as the family increases and children grow to the age when they need rooms of their own, sleeping areas can be readjusted to provide such rooms. This the architect plans to do by rearranging the partitions—which are actually plywood cabinets four feet long and two feet wide—between the rooms.

Children's bedrooms adjacent to their playrooms and are accessible

to the play yard. The yard, incidentally, is far enough away from the parents' bedroom to permit the children to whoop it up early in the morning without disturbing mother and dad.

Sound proofing, of course, enters into the construction of such a house. Also, the natural sound absorption qualities of wood are taken advantage of to prevent sound carrying through the house. Standard prefabricated panels of plywood serve as decorative wall structure. It is thus possible for adults to read and study in rooms adjoining the activity center.

Saves Mother Steps
For the very young child, the architect also has planned a "domestic center" which includes a kitchen large enough to accommodate the youngsters' high chair and play pen, as well as a meal service corner. To save the busy mother from running in and out

of the house a dozen times a day to see how the children are, he has provided observation ports overlooking the nursery, play area and other spots where children will be found.

EVERY PLY OF EVERY RIVERSIDE IS... 12% STRONGER!

THAT'S WHY WE SAY... More MILES OF SAFETY ON RIVERSIDES!

Today... Riversides are even stronger... 12% stronger than our super-safe, pre-war Riversides! Every ply is stronger because each individual cord is stronger to begin with, then each cord is chemically-strengthened in an impurity-removing bath to make it stay stronger longer! Next, the cords are immersed in a "bonding" solution which "welds" them together. In the final operation, the cords are imbedded between two layers of synthetic rubber. THE RESULT:—A Riverside ply... a 12% stronger ply! It's this built-in strength that insures your getting MORE MILES OF SAFETY ON RIVERSIDES!

"SPIKE TEST" proves RIVERSIDES 12% stronger plies give greater blowout protection!

In this test a big steel spike is shot into the tire like a projectile! Yet, no blowout, not the slightest damage!

Confirmation To
Be Held Sunday

A class of twenty-three will be confirmed at the Bethany Evangelical Lutheran church Sunday morning at 10 o'clock. An examination of the class will be held tonight at 8 o'clock. The public is invited to attend both of these services.

The class was organized last fall, and has met every Saturday since, except during the holidays. The last two weeks they have met daily. They began their instruction under the former pastor, Dr. C. Albert Lund, who in his ministry has confirmed 37 classes, totalling 1,209 young people.

At the Confirmation service, the Rev. Gustav Lund, pastor, will speak on the subject, "Upon This Rock." At their First Communion, on Sunday evening, the pastor will speak on the subject, "Christ Himself."

Members of the class are: Anna Adele Carlson, Barbara Ann DuChaine, Dorothy Mary Ann Erickson, Joan Mae Hedsten, Anne Marie Hendrickson, Joy Janet Hogan, Eunice Charlotte Holmes, Barbara Marie McCormick, Marian Gertrude Pearson, Betty Joan Pearson, Jane Helen Andrea Peterson, Louvaine Ann Schils, Jewel Ann Lavina Sundelius.

Gustaf Andrew Anderson, Donald Oscar Bloomquist, John Robert Carlson, Marvin Leroy Cartwright, Arnold Lloyd Dahlin, Wallace Ronald Day, Warren Renold Gustafson, Charles William Irving, Richard Gene Nelson, Harold Wesley Sundelius.

Class officers are Harold W. Sundelius, president, and Anne Hendrickson, secretary-treasurer. The class motto is "Stir up the gift of God that is in Thee." II Tim. 1:6.

HOW'S YOUR I. Q.?

Can you answer seven of these quiz questions?

1. Was Sir Joshua Reynolds a British explorer, actor, painter, or novelist?

2. Canada pays a bonus to all parents who have children under 16 years of age; true or false?

3. Name the new Secretary of Agriculture.

4. Is Cocos Island in the Atlantic, Caribbean, Pacific, or Indian Ocean?

5. Was the United States ever a member of the League of Nations?

6. Meteorites have chemically the same composition as our earth; true or false?

7. On what island is Port Moresby?

8. Does the name Charles P. Steinmetz suggest to you electricity, astronomy or agronomy?

9. In parliamentary law, a proposal upon which action is to be taken by vote of the assembly is called a m-----?

10. Memberships in the New York Stock Exchange are called -----?

ANSWERS TO THE DAILY QUIZ

Below are the correct answers to the quiz questions.

1. Painter.
2. True.
3. Clinton P. Anderson.
4. Pacific.
5. No.
6. True.
7. New Guinea.
8. Electricity.
9. Motion.
10. Seats.

HOME REPAIRS and STAINS

GRADUATES—Miss Edna Mae Heidenreich, R. N., graduated June 23 from the University of Michigan school of nursing at Ann Arbor, where the graduation program was held in Hill auditorium. Miss Heidenreich, a graduate of Escanaba high school, is the daughter of Mr. and Mrs. A. Heidenreich of 1022 South Ninth avenue.

Social - Club

Rebekah Grocery Party

Phoebe Rebekah Lodge No. 179 will hold a grocery party Friday evening, June 29, at the I. O. O. F. hall, North Tenth street, beginning at eight o'clock. Proceeds of the party are to be used to buy art equipment and supplies for classrooms at the Percy Jones Veterans hospital and Fort Custer Annex at Battle Creek, Mich. The public is cordially invited to attend the party.

Royal Neighbors

There will be a regular meeting of the Arbutus Camp this afternoon at 2 o'clock at Grenier's hall. Following the meeting, there will be a social hour. All members are urged to attend.

Pick Up Your
Piquant Charm

If nature has played a trick on you and given you a set of eyelashes which are not color twins—one eye which is darkly draped and the other a blonde surprise—the clever thing to do is to leave fringes unmatched and make capital of the piquant charm this contradiction gives to your face.

It's easy enough to tint one blonde set of eyelashes dark to match its mate, but you're warned against the obvious by a girl who has tried that and doesn't think it works.

Says Rene Kuhn, young New Yorker whose first novel "34 Charlton" has just been published, "It's a mistake to make a piquant face look like every other face."

To keep her blonde-fringed eye from fading out of the picture, she says she just barely tips that set of lashes with dark mascara. But the root-edge of the pale lashes are kept blonde to preserve the provocative effect.

To make white sauce more savory, add 2 whole cloves and 1/2 small onion.

Personal News

Ed Jensen has returned from Battle Creek where he visited his son, Pvt. Robert Jensen, who is receiving treatment for wounds received in action in Italy on March 5. Mr. Jensen reported that the condition of his son was much improved. Pvt. Jensen was a member of the U. S. Army ski troops.

"Corky" Johnson, 1223 South 13th street, left Sunday night for Fairfield, Mont., where he will spend the remainder of the summer.

Miss Dorothy Jaeger arrived Saturday night on the "400" to spend a two-week vacation at the home of her parents, Mr. and Mrs. Richard Jaeger, of Ford River.

Pfc. Albert Weidman, former resident of Escanaba, is visiting here with his aunt and uncle, Mr. and Mrs. Joseph Boyer, 516 South 15th street. Pfc. Weidman recently returned from three years service with an anti-aircraft unit in Africa, Sicily and Italy, and has been discharged under the point system.

Mrs. Vern McGinnis has received word from her husband, Pvt. Vern McGinnis, that he has arrived somewhere in the South Pacific. Pvt. McGinnis is the son of Mr. and Mrs. John McGinnis of Ford River.

Mr. and Mrs. Ronald H. Koth and daughter, Karen Kay, are visiting Mr. Koth's parents in Crandon, Wis.

Mrs. Frank Loeffler of Lansing is visiting at the home of her son, Edward J. Loeffler, 815 Third avenue south.

Mrs. F. J. Ford and son Ronnie of New York are visiting at the Eric Froberg home, 1217 Eighth avenue south.

F/O John Froberg has returned to Hondo Field, Texas, after spending a furlough with his parents, Mr. and Mrs. Eric Froberg. Mrs. Milton Turnquist, 1222 Stephenson avenue, left Wednesday for Detroit to spend a vacation at the home of Mr. and Mrs. H. C. Mitchell.

Mrs. E. Geyer, 224 North 15th street, is visiting her daughters, Marie and Mildred, in Milwaukee.

Mrs. Ida Sabuco and son Ray, 615 Ludington street, have returned after spending a week visiting in Chicago.

Mrs. John Gherna, South Seventh street, spent last week in Manistique at the convention of the Eastern Star and has returned to her home.

Ralph Frasher who visited his parents, Mr. and Mrs. Fred Frasher, following his recent honorable discharge from the army, has gone to Detroit.

Miss Francis Hruska has returned to her home in Detroit after visiting relatives and friends in Nahma and Escanaba.

Kathryn Ann Leach of Lansing is visiting here with her sister, Mrs. Harriett Deno, 602 South Eighth street.

Mr. and Mrs. George Jensen, 1616 First avenue south, left last

night for Des Plaines, Ill., to attend the funeral of Mr. Jensen's uncle, Hans Jensen.

Mrs. A. W. Plante and Mrs. L. C. Gerard, 914 First avenue south, have returned from a visit at Texarkana, Texas.

Francis Corbett, 215 North 14th street, left Monday for Camp Grant where he will receive his basic training in the army.

Margaret Pauset of Chicago is spending two weeks visiting Mrs. Anna Richter, 211 North Eleventh street.

Mrs. John Papineau, Mrs. John Engstrom and Mrs. George Troth and sons of Michigan City, Ind., will visit for the next ten days with the Everett Johnson family in Ensign.

Mrs. E. A. Salisbury of Hastings, Neb., has arrived to make her home with her daughter, Miss Donna Salisbury, 820 First avenue south.

Mrs. Charles Williams has returned to her home in Stonington after visiting with friends for several days in Chicago.

Mrs. Eva Peltier of Iron Mountain spent Wednesday with Mr. and Mrs. Fred Cousineau, 1411 North 20th street.

Mrs. Earl Wurth and two children have arrived from Enid, Okla., and will make their home with Mrs. Wurth's parents, Mr. and Mrs. Edward Poquette, 1302 North 21st street.

Mr. and Mrs. Robert West have left for Detroit where they will visit for several days.

Miss Betty Brebner, 1711 First avenue south, has gone to Manistique where she intends to visit with friends and relatives.

S. J. A. J. Fontaine, who is spending a leave with his parents, Mr. and Mrs. A. W. Fontaine, 128 Elm street, Manistique, spent Wednesday visiting with his aunt and uncle, Mr. and Mrs. George Peterson, 328 South 18th street.

Mrs. Donald Culver and daughters Dorothy Lee and June of Chicago are the guests of Mrs. Culver's mother, Mrs. J. H. Kincaid, Rt. 1, her brother and his family, Mr. and Mrs. C. Kincaid, 213 South Eleventh street, and her sister, Mrs. E. Dwyer, 308 South 16th street.

Miss Annette Boyle of Racine is spending several days with her mother, Mrs. Dorothy Boyle.

Mrs. Bernard Dwyer and son Jack, 308 South 16th street, spent Tuesday visiting in Powers.

Mrs. Arthur Kamrath, 1012 Eighth avenue south, has returned after spending two weeks visiting in Grand Rapids, Minn.

Mrs. Joseph Savini, treasurer, and Mrs. Mame Svykard, president of the Michigan State Circle of the Daughters of Isabella, re-

turned to their homes in Calumet on Wednesday after attending a directors meeting in Cheboygan and the initiation of Trinity Circle 362, here.

Miss Lois Danielson returned to her home in Marquette on Wednesday after visiting with Miss Ellen Marie Flath, 504 South Fifth street, for several days.

Helen Bellamy spent Tuesday night in Escanaba on her way to Petoskey, where she will visit before returning to her home in San Francisco.

Pfc. Bernard Currie spent Wednesday in Escanaba on his way to spend a 30-day leave with his sister, Cecelia Kelly, in Marquette. He returned June 18 from the European theater where he was a member of the transportation corps and after his furlough will report to Fort Sam Houston, Tex.

Pfc. Emery Rushford of Munising stopped in Escanaba on Wednesday on his way to spend a 30-day leave with his wife and mother, Mrs. Olive Rushford of Munising. After his leave he will report to Fort Sam Houston, Tex.

Miss Betty Haddy, 1205 Tenth avenue south, is visiting relatives in Chicago and Fond du Lac. Miss Joyce Haddy is visiting in Fond du Lac and Oakfield, Wis.

Bill Anderson, son of Mr. and Mrs. Ole Anderson, 1319 Stephenson avenue, left Tuesday for Ann Arbor, where he will go into training under the NROTC program at the University of Michigan after completing the V-12 navy course at the Western Michigan College of Education at Kalamazoo.

Lt. John Birkenmeier, who was recently liberated from a German prison camp, has arrived here to spend a 60-day furlough at the home of his parents, Mr. and Mrs. John Birkenmeier, 1008 Ninth avenue south.

turned to their homes in Calumet on Wednesday after attending a directors meeting in Cheboygan and the initiation of Trinity Circle 362, here.

Miss Lois Danielson returned to her home in Marquette on Wednesday after visiting with Miss Ellen Marie Flath, 504 South Fifth street, for several days.

Helen Bellamy spent Tuesday night in Escanaba on her way to Petoskey, where she will visit before returning to her home in San Francisco.

Births

A son was born Wednesday to Mr. and Mrs. Roy E. Brown, 1019 Seventh avenue south. The baby, named Patrick Royer, is the first child in the family, and the second grandchild of Mr. and Mrs. Joseph E. Brown, 315 South 16

FOREST STUDY PLAN REVIEWED

Michigan Tech Professor
Speaks At C. Of C.
Meeting

Progress being made in the program to promote fuller utilization of the forest resources of the Upper Peninsula and the rest of the state was reported by U. J. Noblet, dean of the forestry school of the Michigan College of Mining and Technology, Houghton, at a meeting of directors and industrial committee of the Escanaba Chamber of Commerce yesterday.

Mr. Noblet is also a member of the forest resources research committee of the Michigan Planning commission. He said that plans are under way to establish a forestry research institute at the Houghton college, and introduced Dr. Herford Garland, who has been engaged to conduct the work in wood technology. Dr. Garland was formerly associated with the forest products laboratory at Berkeley, Calif.

Pointing out that the Upper Peninsula has one of the largest stands of hardwood timber remaining in the country, Mr. Noblet said there should be opportunity for establishing new woodworking industries in this area. One of the principal objectives of the agencies now at work on the problem is to bring about a greater utilization of the available timber with a view toward creating additional employment in the postwar era. He mentioned that it is estimated that 23 per cent of the tree is wasted in the woods and an additional 43 per cent is lost at the mill, so that only about 34 per cent is actually used.

Mr. Noblet estimates there is more than a half billion feet of aspen in the Upper Peninsula, much of which is going to waste because of the damage done by the aspen bore. New defoliarizing processes offer opportunity for the utilization of this wood, he added.

Also in attendance at the meeting was Wayne Lewison, representative of the Draper corporation of Beebe River, N. H., manufacturers of textile looms and other equipment. He described briefly the company's bobbin manufacturing operations.

Oliver J. Murray, Former Resident, Dies In Detroit

Oliver J. Murray, 50, former Delta county resident, died yesterday in Detroit, where he had been employed in a defense plant for the past three years.

Before going to Detroit, Mr. Murray was employed by the Bay de Noc Lumber company at Nahma. He was born in Princeton, on June 5, 1895.

Survivors include the following brothers and sisters: Mrs. John Leonard, Wash.; Michael Murray, Minneapolis; John Murray, Gladstone; Mrs. Frank Boyle, Escanaba; and an uncle, Patrick Hawkins, Escanaba.

The body will arrive in Escanaba today and will lie in state at the Degnan funeral home at 3 o'clock this afternoon. Funeral services will be held Friday morning at 9 o'clock at St. Patrick's church. Rev. Fr. Norbert Frei-

News From Men In The Service

Pfc. Emil Erickson, 608 South 15th street, Pfc. Ruben F. Johnson, 629 North 20th street, and T/5 John C. Ward, 112 South Ninth street, Escanaba, have arrived from the reception station at Camp Grant, Ill., after lengthy service in Europe. Upon completing their furloughs, they will be transferred to another camp within the United States to receive additional training for service in the Pacific.

With the 100th Division, Seventh Army, Germany—When Lawrence F. Bourgeois and Loren J. McGovern met as strangers at the induction station at Marquette, Mich., on April 7, 1943, and were given army serial numbers just 28 numerals apart, they had no way of knowing their army careers were to parallel each other so closely.

Bourgeois comes from Menominee, Mich., and McGovern from Escanaba, about 50 miles away. At the induction center they were singled out for shipment to Camp Grant, Ill., where they were both assigned to Company A, 38th Medical Training Battalion, in the same position and same squad.

At the end of the basic training cycle, the company was split and sent to medical units all over the U. S., but Pvt. Bourgeois and McGovern were both shipped to the 325th Medical Battalion of the

burger will officiate and interment will be made in St. Joseph cemetery.

100th Division. When they both turned up as litter bearers in the same squad and platoon of the 325th's Company B, they were convinced that "our records had accidentally glued together."

Having long since become close buddies, they managed to get furloughed together—to Michigan. Meanwhile, each had received private first class stripes on March 24, 1944.

Since coming overseas, the Century medics agreed that they had gone through some rough times together. "Like the time we were out for 24 hours trying to get casualties back," reminisced Pfc. McGovern. "There was so much stuff coming in that day that it took over six hours to move one casualty a mile and a half."

Both these 100th Division litter bearers were awarded the Bronze Star for meritorious achievement in action on the same day. "I hate to spoil your story," grinned Pfc. McGovern, "but I

Road Builders Meet Today At Houghton

The 37th annual meeting of the U. P. Road Builders association is being held today at the Douglass House at Houghton, with about 50 state and county road officials in attendance. Principal speakers will be State Highway Commissioner Charles M. Ziegler, Brig. Gen. Frank E. Lowe of the U. S. Army, Lt. C. W. Lindgren of the Navy, and S. B. Steers, director of the state board of aeronautics.

Attending the meeting from Delta county are J. T. Sharpsteen, county road commission engineer, and A. A. Anderson, engineer in charge of construction in the Upper Peninsula, from the state highway office in Escanaba.

think you ought to know that, as of a couple of weeks ago, it's Surgical Technician T/5 Bourgeois."

Obituary

MRS. MARIE HAMELIN
Funeral services for Mrs. Marie Hamelin were held at St. Ann church yesterday morning, with Rev. Fr. George Laforest officiating. Burial was in St. Ann cemetery.

Pallbearers were Fred LaFleur, William Viau, Dave Godin, Ovilla LaFave, Joseph Beauchamp and Isadore Chartrand. Out-of-town persons who attended the funeral included Alpha Trudeau, Mrs. Ernest Cornaya, Mr. and Mrs. Fred Pizzala, Mrs. Ida Laron, Mrs. Arthur Halvorsen, Mrs. Cora delia Sangrum, all of Manistique; Mr. and Mrs. Joseph Chenier, Schaffer; Mr. and Mrs. Edgar Burnard, Fayette; George Stratton, Nahma.

Music of the mass was sung by the St. Ann senior choir. At the offertory, "Jesu Salvator" was sung by Mrs. Merle Dye.

MRS. MARGARET WAGNER
Funeral services for Mrs. Margaret Wagner, 84, will be held at St. Joseph's church Friday morning, with Rev. Fr. Alphonse officiating. Burial will be in the St.

Joseph cemetery. Members of St. Mary's court, W. C. O. F., will meet at the Alto Funeral Home chapel 4 o'clock this afternoon to recite the Rosary.

Make Final Report
On Clothing Drive

Acknowledgement has been made by the National Clothing Collection committee headquarters of the receipt of about twenty tons of clothing donated by citizens of Escanaba and vicinity in the recent campaign. A. M. Gilbert, general chairman, announced yesterday. Last shipment of clothing was made on June 13.

A letter of thanks has been received from Dan A. West, New York, executive director of the drive, which was headed up by Henry Kaiser, noted shipbuilder.

In behalf of the local committee, Chairman Gilbert expressed gratitude for the cooperation received from residents of Escanaba, Rock, Rapid River, Ensign and other nearby communities. The collection far exceeded the committee's expectations, Mr. Gilbert said.

News From Men
In The Service

Mrs. Joseph Farley of Garden has received the following communication from Herfeld, Germany concerning her brother, Wallace Cooper:

By Regimental General Order as of Jan. 25th, 1945, Technician Fifth Grade, Wallace W. Cooper, has been awarded the "Medical Badge." This distinction and honor is given only to the "front line medics." It is a recognition by the Army and the people of our country of the important role being performed by medical personnel under actual combat conditions, sharing with the Infantry all its hazards and hardships. Because of his work and devotion to duty many American wounded boys are alive today. It is with profound pride that I congratulate you.

Sincerely yours,
Gregory G. Floridis
Maj. Med. Corps, Com.

Engadine

Engadine, Mich.—Mr. and Mrs. Edward Marcus of Detroit arrived last week to spend several weeks visiting her mother, Mrs. Walter Krafke and Mr. and Mrs. Fred Marcus, parents of Edward Marcus.

Mrs. August Marquette has gone to Alpena on a business trip.

In the month of June there has been four barn raisings north of Engadine. They were at William Germain, Henry Schroeder, Fred Perchinski and Joe Crnkovich.

Miss Geneva Brawley a graduate nurse from Providence hospital, Detroit, has accepted a position at the Memorial hospital, Sault Ste. Marie.

Mr. and Mrs. Herbert Fisher, Mrs. Hugh Fisher and son John and Mrs. Sig. Fendrick, made a trip to Escanaba Monday evening to meet their son, Cpl. Hugh Fisher, who was a prisoner of war in Germany. Hugh has a furlough of sixty days.

S/Sgt. Philip Collins left Friday evening for Santa Anna, Calif., following a 30 days furlough with his mother, Mrs. Albina Collins and other relatives.

Radium Rays Used
To Determine The
Thickness Of Steel

New York—The thickness of the steel in the walls of a boiler tank, or the level of the liquid inside the tank, can now be determined accurately without drilling holes through the metal by means of a new instrument that employs radium rays from a commercially available radium salt. It can be used to measure the thickness of any type of material, and also to determine the densities of liquids.

The new instrument, called a Penetron, will be demonstrated here to a group of scientists by the Texas company as it is a product of a subsidiary, the Texaco Development Corporation. It will be manufactured and sold by Engineering Laboratories, Inc., Tulsa, Okla.

In use, the portable 40-pound Penetron is placed in position against the outside wall. It does not require access to the containing vessel. The apparatus has a detector head connected through a flexible rubber-coated cable to a control case. In this is electronic equipment, and on it is mounted the meter from which readings are taken.

Commish Endorses
Midnight Closing
Of Local Taverns

The proposal of the Delta County Tavern association to have taverns close at midnight Sunday through Friday was endorsed by resolution by the Gladstone city commission this week.

Whereas, the Council has received a communication from the Delta County Tavern association requesting the closing of taverns from Sunday through Friday of each week at 12 o'clock p. m., C. W. T., and with Saturdays, the eve of and all legal holidays and conventions to be open as permitted by the Liquor Control Commission of the State of Michigan.

Now Therefore, Be It Resolved, that the thought of this Council is that the licensees selling intoxicating liquors in the city of Gladstone close their establishments at 12 o'clock p. m., C. W. T., on Monday, Tuesday, Wednesday, Thursday and Friday of each week and that they remain open as permitted by the Liquor Control Commission of the State of Michigan on Saturday, the eve of and all legal holidays, conventions and any other special occasions to be designated by the Council; provided that the other municipalities take similar action.

Briefly Told

Dogs Chase Deer—Complaint that dogs were chasing deer in the vicinity of St. Jacques was received yesterday by the state police post here.

Woman's Department—A regular meeting of the Woman's Department of the Latter Day Saints' church is to be held at the home of Mrs. Wm. O'Brien on Lake Shore Drive this evening at 7:30 o'clock. Mrs. Robert McGilvray will assist Mrs. O'Brien.

Civil Service—Civil Service examinations for stenographers and typists will be held on Friday at 8:30 a. m. in the junior high school building. Douglas Mathison, local Civil Service secretary, will conduct the examinations.

Dr. and Mrs. H. C. Stecker have left for their home in Wilmington, Delaware following a visit with Dr. Stecker's parents, Mr. and Mrs. George Stecker. They were accompanied east by Cadet Russell Stecker who will enter West Point and Rev. Clifford Anderson who is going to Boston, Mass.

Mr. and Mrs. R. D. Huginin of Marinette are visiting here as guests of Mr. and Mrs. Paul Snouwaert.

Trenary

Frank Vandershuren
Family In Belgium
Survive Occupation

The Frank Vandershuren family which removed to Belgium from Gladstone about 11 years ago are all safe and sound, according to a letter received from the family by Miss Gertrude Peterson, Milwaukee, daughter of Mr. and Mrs. Emil Peterson, 1320 Michigan avenue.

The family resides on a farm and did not suffer too much during the German occupation, the letter indicated. There are five children in the family, three having been born in America and two in Belgium. The oldest boy, Bernard, is studying for the Roman Catholic priesthood while their daughter, Margaret, is taking nurse's training.

The Vandershurens will be remembered by many Gladstone residents. Some local servicemen, who knew them when they resided here, made efforts to locate the family when Belgium was liberated but without success.

City Briefs

The Marvin Olives have moved from 404 Delta avenue to 1408 1/2 Wisconsin avenue.

Mr. and Mrs. Roy VanMill, Wisconsin avenue, are the parents of a son, Joseph John, born June 23 at St. Francis hospital. The child is the third in the family and the second son.

Clarence Naylor of Detroit is visiting with relatives in Gladstone.

Pfc. and Mrs. Louis Schness Jr., have returned to Camp Butler, North Carolina, where he is a member of the Military Police, following a 15 day furlough spent at Shawano Lake and in Gladstone with Pfc. Schness's parents, Mr. and Mrs. Louis Schness. Pfc. Schness has been in service four years.

Joanne Venne left Tuesday for Camp Wehawke, a summer camp for girls near Marinette, Wis.

John Johnson has left for his home in Stonington. He has resided at the home of Mr. and Mrs. Edward Berg, 515 Michigan avenue, for the past eight years.

Mr. and Mrs. Emil Nelson of Lincoln Park and Mr. and Mrs. Ray Poss of Norway are visiting at the home of Mr. and Mrs. Robert Axelson, North 15th street.

Mrs. Dan Finlan and son, Tommy, left Wednesday morning for Chicago where they will meet Sgt. Dan Finlan who has just returned from Germany where he has been with the U. S. Army for the past four months. Sgt. Finlan will accompany Mrs. Finlan and Tommy here to spend a 30 day furlough.

Mr. and Mrs. H. Durwisk of Milwaukee are spending several days visiting at the home of Mr. and Mrs. Peter Bauer, 421 Montana avenue.

Mr. and Mrs. John Enders of Marinette spent Sunday visiting at the Harold Enders home.

Credit Mark Bricco
Is Given Discharge

With 127 points to his credit, T/Sgt. Mark S. Bricco was discharged from the Army Air Force on June 23 at Fort Sheridan, Ill., and he is now in Gladstone visiting with his wife, the former Mary Cannon, at the Peter Cannon home, 1216 Dakota avenue.

Sgt. Bricco joined the Air Force August 28, 1940. He has the Air Medal with five Oak Leaf Clusters, the European Theater ribbon with two battle stars, good conduct medal and pre-Pearl Harbor medal.

Issued to him upon his completion of 35 heavy bombardment missions over enemy occupied continental Europe March 11, 1945, was the following statement over the signature of G. Y. Jumper, Colonel, Air Corps, commanding:

"While serving as Aerial Engineer and Top Turret Gunner on a B-17 'Flying Fortress,' Sgt. Bricco by his expert marksmanship ward off hostile fighter attacks on his aircraft and formation. The actions of Sgt. Bricco were highly instrumental in the successful completion of vital aerial operations and contributed greatly toward the safe return of his aircraft and fellow crew members, after penetrating deeply into continental Europe and Germany. Some of the more noted bombing missions Sgt. Bricco has participated in are:

The oil refineries and synthetic oil plants at Merseburg, Hanover, Madgeburg, and Hamburg; marshalling yards and enemy supply centers at Saarbrücken, Wetzlar, Hamm, Mainz, Coblenz, Karlsruhe, Kaiserlautern, Kassel, Wesel and Fulda; and enemy aircraft factories and vital industries at Mannheim, Frankfurt, Dessau, Berlin, Chemnitz, Munich and Dortmund.

"For his exceptionally meritorious achievements in aerial combat against the common enemy, Sgt. Bricco was presented with the following awards: Aid Medal, 1st Oak Leaf Cluster, 2nd Oak Leaf Cluster, 3rd Oak Leaf Cluster, 4th Oak Leaf Cluster and he has been recommended for the 5th Oak Leaf Cluster."

You Step Out
With Me Tonight?

I know I've been an awful grouch not taking you any place lately. But after standing all day at my new job, my feet darn near killed me with callouses and burning. Now I've reformed—or rather my feet have—thanks to the medicinal Ice-Mint you advertised. Never tried anything that seemed to draw the pain and fire right out so fast—and the way it helps soften callouses is nobody's business. Been able to get some extra overtime money—so what do you say, let's go dancing tonight. You can step on my Ice-Mint feet all you want.

111 Cedar StreetSUPERVISORS
HOLD SESSIONIncrease Valuations;
Transact General
County Business

Fixing valuations of taxable property in the county and attending to general matters of routine business were completed in a two day session of the County Board of Supervisors held Monday and Tuesday.

The valuations fixed by the supervisors will be \$191,661 greater this year than in 1944, a comparison of the record reveals.

The building and grounds committee recommended that certain county owned lots in the city of Manistique be sold and the board acted favorably upon the suggestion. The lots will not be designated and made public, however, until abstracts of them are completed.

The board passed a resolution requesting that the report of the board of audits be withheld until the fiscal year is completed.

An appropriation of \$150 to the Schoolcraft-Manistique Chamber of Commerce was voted and the county treasurer was instructed to make and forward a warrant for that amount to the Chamber secretary.

William Tennyson and Louis Tebo were named to represent the board at the coming meeting of the Au Train canal meeting soon to be held at Escanaba.

The board ordered that grass on the runway of the airport east of town, be cut and that efforts be made to destroy the woodchucks whose burrowing operations have become a problem.

A resolution of condolence to the family of the late Melville McPherson was passed.

The county road commission was informed that all tractors and trucks disposed of by the commission must be advertised for bids.

The following valuations on property in the different townships were fixed:

Doyle	\$ 202,320
Germfask	181,275
Hiawatha	447,110
Invokod	260,620
Manistique	211,145
Mueller	818,600
Seney	229,601
Thompson	286,070
City of Manistique	3,732,300
Total	\$6,369,041

Perkins

Perkins, Mich.—Mr. and Mrs. Louis Blubraugh of South Bend, Ind., spent the week end visiting with Mr. and Mrs. F. Miljour on their way to San Francisco, Calif. where Mr. Blubraugh will take a government job. Mrs. Blubraugh is the former Evelyn Miljour.

Mr. and Mrs. L. Miron and Elmer Dugas of this place and Mr. and Mrs. Levi Lauern and daughter Phyllis Ann of Detroit left Sunday for a weeks camping at Munising.

Mrs. Eileen Miljour and children Patsy, Gary, Murrill, Fillex and John spent last Thursday visiting relatives here.

Mr. and Mrs. Gus Kline and daughter Ann left Monday for two weeks vacation with relatives in Iron Mountain and at Merrill, Wis.

Mrs. W. M. Trudell returned to her home Sunday after visiting the past week with relatives in Trenary.

Mrs. David Gerou of Gladstone, formerly of this place is visiting with relatives here this week.

Mrs. F. Fuhrmann spent Sunday with relatives in Gladstone.

A. J. LaFountain of Iron River arrived Saturday night to meet his wife and son Tommy who have been visiting for the past week with Mr. and Mrs. J. Gerou. They returned to their home Sunday.

Ed. Lampra of Marquette and Jerry Lambert of Isabella visited

City Briefs

Miss Norma P. Tatrow of Garden spent a week at the home of Mr. and Mrs. Archie Murphy, 109 North Second street.

Mrs. Tom McDonough and children, Jerry and Terry, of Escanaba spent a week visiting relatives in Manistique.

Earl Murphy, who spent 26 months in a prison camp in Germany, is home on a 60-day furlough before returning to a rest camp in Miami Beach, Fla.

Janet Dupont is spending a week visiting at the Tom McDonough home in Escanaba.

Miss Thelma Robertson arrived Monday from Kalamazoo where she graduated Saturday from the Western Michigan College of Education, to visit with her parents, Mr. and Mrs. Alex Robertson. Miss Betty Bentley of Kalamazoo, a guest of Thelma, is visiting here for a few days.

Mrs. Alice Morrison is spending two weeks at Hermansville visiting with her daughter, Mrs. Conrad Swanson and family.

Miss Mary Beauvais has returned to her home in Manistee following a visit here with her brother-in-law and sister, Mr. and Mrs. Carl Carlson.

Peter VanEyk of Marinette is spending several weeks here visiting at the home of his son, Kenneth VanEyk.

Arthur Fountain, A.S. left yesterday for Great Lakes following visit here with his parents, Mr. and Mrs. Arthur Fountain, Elk street.

Bruce Rossier left Tuesday for Detroit where he will attend an electric plating school.

Edward R. Clish, S. 2 C, who has just completed his boot training at Great Lakes, is visiting here with his wife and other relatives.

BREWMASTER APPOINTED

Menominee—Joseph Fox, Lebanon Springs, Pa., yesterday took over the duties of master brewer and plant superintendent of the M. & M. Brewing company, succeeding Sigmund Lingelbach who resigned to accept a similar post with a Pensacola, Fla., brewery.

Fox is a graduate of the A. E. Siebel Bureau of Biotechnology, of Chicago, Class of 1936, and has had experience as brewmaster at the Kingsbury brewery, Manitowish; Kiley Brewing company of Marion, Ind.; and the Lebanon Springs Brewing company in Lebanon Springs, Pennsylvania.

with Mr. and Mrs. Fillex Miljour Saturday. Mr. Lampra is an uncle of Mr. Miljour and Mr. Lambert a cousin.

Mr. and Mrs. Levi Lauern and daughter Phyllis Ann of Detroit arrived Friday to spend their vacation here with relatives.

Mrs. Frank LaChapell and children of Escanaba spent the week end with her sister and brother-in-law, Mr. and Mrs. Manly Roger.

William George Duquette
Lost Life When Jap Ship
Was Torpedoed In October

That William George Duquette, 25, son of Mr. and Mrs. Henry Duquette, 232 Schoolcraft avenue, held prisoner of war by the Japanese, lost his life when the ship on which he was being transported from the Philippine Islands to Japan was sunk, has now been definitely established.

The young man's parents received a letter Monday from the navy department stating that records captured from the Japanese reveal that last October he was being transferred from the Bilbid prison camp on the Philippine Islands to some undetermined point and that the ship on which he was being taken, had been torpedoed off the coast of China.

The parents had been previously informed that something of the sort had probably happened, through letters from William's comrades, who had been in the same prison camp but had later been rescued, but the letter received Monday comes the nearest to confirming the news of his fate.

The letter follows:

"Dear Mr. and Mrs. Duquette:

"Your son, William George Duquette, Seaman First Class, United States Navy, has been carried on the official records of the Navy Department as a prisoner of war.

"A full review of all evidence pertaining to the status of your son has been made. It has been ascertained that on October 11, 1944, your son who had been held captive by the Japanese in the Bilbid prisoner of war camp, Philippine Islands, was placed on board a Japanese freighter, apparently en route to Japan. The ship was anchored in the cove of an island about 200 to 300 miles from Manila for about six days before it returned to Manila on October 20, 1944 and from there in a convoy of Japanese ships, proceeded in a general northward direction. On October 24, 1944, this ship which bore no mark to indicate it was carrying prisoners of war, was torpedoed and sunk off Shooman, eastern coast of China. Records maintained by the Japanese authorities in the Philippine Islands have come into the possession of United States Naval personnel and these records reveal that your son did not survive the sinking. Eight months have elapsed since the date of the disaster, during which time no further word has been received.

"It has therefore been determined that your son died on October 24, 1944, as a result of the sinking. Accordingly his status has been changed on the records of this bureau from prisoner of war to deceased.

"The Navy Department shares in your loss and extends sincere sympathy to you in your sorrow. It is hoped that you may find comfort in the knowledge that your son gave his life for his country, upholding the highest traditions of the Navy.

"By direction of Chief of Naval Personnel,

"Sincerely yours,
"W. J. McNicol Jr."

William George Duquette was born in Manistique on August 14, 1920, and up to the time of his enlistment had lived in this city all his life. He entered the service in November, 1940, and went overseas in January, 1941. He was taken prisoner by the Japanese in May, 1942.

Surviving him are his parents, five brothers, Leon and Donald, both in the navy; Richard, James and John, at home; four sisters, Mrs. Isaac Pawley Jr., Dorothy, Lois and Betty, all of Manistique.

St. Nicholas

Honored at Party

St. Nicholas, Mich.—Miss Dorothy Demuse of St. Nicholas and Miss Irma Demuse of Perkins were the honored guests at a party given Sunday evening at the Brampton hall by a group of friends in honor of their birthday anniversaries.

Dancing was the main diversion of the evening and a potluck lunch was served.

The honored guests received lovely gifts from their many friends.

Briefs

Miss Margaret Heynness returned to Milwaukee Sunday after a weeks visit at the home of her parents, Mr. and Mrs. Louie Heynness.

Mary Louise Jodocy is spending a week in Marquette with relatives.

Pvt. Phil Lippens returned to Rome, Georgia, following a 30 day convalescent furlough spent at the home of his parents, Mr. and Mrs. Adolph Lippens.

Miss Louise Miron has received word that her nephew Cpl. Alphonse Miron is now stationed at

Timber Trail
Increasing In
Popularity

The popularity of Timber Trail, the Girl Scout camp at Skeels Lake, has grown to that state that the demand for accommodations has exceeded the supply. Local

sponsors have received word that the registrar at Marquette has had to refuse more than fifty applications for accommodations because no more can be taken care of.

Mrs. William Girvin, in charge of local arrangements, advises that next year Girl Scouts should register early in May.

Those who have registered from Manistique and secured reservations are:

July 7-14—Betty Stewart, Sally Stewart, Janet Sheahan, Margaret Mueller, Evelyn Anthony, Charlotte Archer and Bonny Larson.

July 7-21—Ann Wygal, Doris Schweikert, Cleo Rae Johnson, Blanche Kopple from Missouri, Lael Richards, Louise Hall, Janet Hughes, Mildred Buruse, Joan Sheahan, Dona Redeker and Letha Bando from Berkeley, Mich.

July 14-21—Joyce McNamara, Janet Gillette from Blaney Park, Sally Gillette from Blaney, Nancy Savard from Blaney and Jeanne Swingle.

July 7-21 and August 4-18—Gail Lundstrom.

July 14-August 4—Ann Marie Sheahan.

July 21-August 18—Florence Hulette, Joan McNamara and Dawn Gustafson.

August 4-11—Faye Wilson.

August 4-18—Lorraine Edwards, Mary Beth Bolitho, Joyce Tank and Helen Hambeau.

A total of 33 girls and a total of 62 weeks.

Important Legion
Meeting Tonight

Attention of Legionnaires is called to the session scheduled at the new Legion quarters for this evening.

Reports on the district convention at St. Ignace will be given and plans for next year's district confab, to be held in Manistique, will be discussed.

Dr. A. R. Tucker, newly elected district commander, will be present and present preliminary plans for the coming year.

Truax Field, Madison, Wis.

Mr. and Mrs. James Barbeau and children, Irvin and Virginia, of Escanaba, were guests of Miss Louise Miron Monday evening.

Mr. and Mrs. Eugene Alexander of Fairland, Wis. were guests at the Henry Vermote home Monday.

Mrs. Agnes Peterson and daughter Eunice of Perkins visited with her sister, Miss Louise Miron on Monday.

LIONS INSTALL
NEW OFFICERSInstallation And Outing
Held At Cookson
Cottage

Officers recently elected by the Lions club were installed in ceremonies conducted at the Cookson cottage on Three Island Lake, Tuesday evening.

Yanks Move Into Tie For First As Senators Mop Up Detroit, 9-1

KNUCKLE BALL TAMES TIGERS

Trout Has Bad Day On Hill, But Homers To Prevent Shutout

Detroit, June 27 (AP)—With Emil (Dutch) Leonard scattering four hits, the Washington Senators walloped the Detroit Tigers 9 to 1 before 24,366 fans today in a twilight game.

Leonard, feeding the first place Tigers his knuckleball with rare effectiveness, allowed but two men to reach second and retired the rest. Paul (Dizzy) Trout's third inning homer prevented a shutout as Leonard rang up his seventh victory against three defeats.

Trout, who was tagged for four hits and three runs in the first inning, suffered his eighth defeat. George Case, George Myatt and Joe Kuhel of the Senators each made three of their club's 13 hits off three Tiger hurlers.

Trout gave six runs and eight hits in six innings before giving way to Joe Orrell. Zeb Eaton, who pitched the ninth, yielded three more runs as the Nats turned it into a rout.

Five of the Washington blows were for extra bases and only one of them was wasted. Case's double, Myatt's single, Kuhel's triple and George Binks' single in the first inning put Trout behind a three-run eighth-inning.

Dizzy made it 3-1 with his third home run into the upper deck in left field and the Tigers threatened to tie it up in the fifth when Jim Outlaw and Bob Maier singled successively with nobody out. Bob Swift's bunt was turned into a force at third, however, and Trout went out on a long fly and Skeeter Webb on a liner to Shortstop Gil Torres to end the rally.

Washington went to work on Trout again in the sixth when Fred Vaughn, Kuhel and Harland Clift singled successively to fill the bases and three more runs came home on an infield out, a forceout and an error.

The Nats had two hits and no runs during the two frames Orrell worked but Eaton had plenty of trouble in the ninth, when three hits, an error, a walk and an infield out meant the last three Washington counters.

The Detroit loss gave New York a chance to move into a first place by taking a night game at St. Louis.

The Sports Parade

By Ken Gunderman

Softball Commissioner Fred M. Klaus, of Menominee, who awarded the upper peninsula softball tournament to Menominee without even taking a ballot among the teams who will participate, has taken exception to the remarks in this column recently which protested against the action of the commissioner. For the purpose of the record, the letter from Mr. Klaus is herewith published.

"Several Menominee prominent businessmen were at Escanaba Saturday and Sunday to participate in the golf tournament, and to their surprise read The Sports Parade item written by you and wish to say that they were very much astonished on the write-up and understood that you will hear from them personally.

"I am an American born citizen and have been very active in civic affairs for the past thirty years and wish to say that I am held by all in the highest esteem and we all take exceptions of your remarks.

"Wish to quote part of letter received by Herbert Kipke, state softball commissioner, under date of May 29th: 'The U. P. commissioner has complete charge of softball and what is done with the U. P. tournament is in his hands. Suggest that you get full particulars before you smear your paper with uncalculated remarks, and especially when he gets no compensation whatsoever for his services.'

The reply to Mr. Klaus, which has been mailed to him, includes the following: 'If you have seen fit to take personal offense from the article to which you refer, I am sorry. I do believe, however, that the method that you used to determine the site for the 1945 softball tournament is entirely wrong in principle, regardless of what the state commissioner may say about the matter. Wrong is wrong, regardless of whomver may condone it.

"Let me say at the outset that I am personally heartily in favor of Menominee for the 1945 tournament. For the past several years

Orrell, p 0 0 0 0 0
Hostetler, x 1 0 0 0 0
Eaton, p 0 0 0 0 0

Totals 31 1 4 27 17
x—Batted for Orrell in eighth.
Washington 300 003 003—9
Detroit 001 000 000—1
Errors—Maier, Eaton. Runs batted in—Myatt 2, Kuhel, Binks 2, Torres, Ferrell, Vaughn, Trout. Two-base hits—Case, Kuhel. Three-base hits—Kuhel, Myatt. Home run—Trout. Sacrifice—Vaughn. Double plays—Webb, Mayo and York; Mayo, Webb and York. Left on bases—Washington 7, Detroit 4. Bases on balls—Off Orrell 1, Eaton 1. Strikeouts—Leonard 5, Trout 5. Hits—Off Trout, 8 in 6 innings; Eaton, 3 in 1; Orrell, 2 in 2. Losing pitcher—Trout. Umpires—Summers, Boyer and Jones. Time—1:33. Attendance—24,366.

I have argued that the tournament should not be conducted in Escanaba as frequently as it has been in the past. I so stated in the article to which you refer. What I oppose and will always oppose is the selection of the tournament site without the softball teams having a voice in the selection. I will continue to oppose that, whether you are anyone else may be the commissioner. If the rules should be revised at the earliest possible opportunity.

"I think I may safely presume that your dander has been aroused by reference to your action 'smacking of the brand of Hitlerism that we have been fighting to bury forever and ever.' Perhaps my selection of words was unparadonable, but I meant no aspersion to your patriotism or to your citizenship. I merely desired to point out, by the use of this expression, that democratic principles still are our most important possession, whether it is in softball or our governmental way of life. Personally, I believe that if you will analyze this action of yours in that light, you will agree with me that it is undemocratic, and being so it is wrong in principle."

Lund Of Michigan Goes To Brooklyn

Ann Arbor, Mich., June 27 (AP)—After reviewing offers from several major league baseball clubs, Don Lund of the University of Michigan has been signed by the Brooklyn Dodgers and will report next week. Terms were not revealed.

Lund captained Michigan's Big Ten baseball champions this spring from a center field position and won three consecutive letters in basketball and football as well as on the diamond.

Rejected for army service because of a trick knee, he was the first choice of the Chicago Bears in the last football draft, but always has indicated his preference for professional baseball.

Lund is a product of Detroit Southeastern high school. He was watched by big league scouts throughout his Michigan career, during which time he batted over 300 and fielded consistently.

End From Tulsa Signs As Packer

Green Bay, Wis., June 27 (AP)—Forrest McPherson, veteran utility man, and Nolan Luhn, a new end from Tulsa University, have returned their signed contracts to the Green Bay Packers, Coach E. L. (Curley) Lambeau announced today.

McPherson originally went to the Chicago Bears in the player draft but was sold to the Philadelphia Eagles with whom he played for two seasons prior to joining Green Bay in 1943.

Luhn is the second Tulsa University end to sign with the Packers. His flankmate, Clyde Goodnight, signed last week.

BROWNS TAKEN FOR 7-2 COUNT

Second Straight Victory Scored Over League Champions

St. Louis, June 27 (AP)—The New York Yankees moved into a tie for first place with the Detroit Tigers in the American league tonight by defeating the St. Louis Browns, 7 to 2.

It was the Yankees second straight victory over the American league champions.

The Browns scored in the last of the seventh when Mark Christman doubled and scored on two infield outs.

Score by innings:
New York 000 000 205—7 8 3
St. Louis 000 000 101—2 6 0
Evans and Garbark; Kramer, Muncie and Hayworth.

Twin Bill Swept By Cincinnati Over Boston, 5-4 and 4-2

Boston, June 27 (AP)—Cincinnati's Vern Kennedy, the 36 year old right hander, won his 100th major league pitching triumph and Boston's batting leader Tommy Holmes hit safely in 23 consecutive games today while the Reds were sweeping a double-header from the Braves, 5-4 in ten innings, and 4-2.

Tribesman Bob Logan held the Reds to two hits until the eighth cap's sixth inning, when two passes, a single and Steven Messner's double to right resulted in a three-run explosion. Holmes knocked in both Boston runs in the seventh by doubling with two mates aboard.

First game:
Cincinnati 110 002 000 1—5 11 1
Boston 000 100 300 0—4 9 2
Kennedy and Unser; Hutchings, Cooper, Hutchings and Mast.

Second game:
Cincinnati 000 003 100—4 7 0
Boston 000 000 200—2 5 1
Fox and Unser; Logan, Hutchings and Hofferth.

Bat-Wild Indians Nip Athletics, 8-2

Cleveland, June 27 (AP)—The Cleveland Indians knocked Russ Christopher from the mound tonight with 11 hits and seven runs, and scored another tally on three hits off relief pitcher Joe Berry, to defeat the Philadelphia Athletics 8 to 2 before 7,472 fans.

Mickey Rocco, Dutch Meyer and Paul O'Dea drove in two runs each. The Tribe counted once in the first, third and fifth frames, garnered a pair of tallies in the fourth and three in the sixth.

Buddy Rosar, the A's catcher, was slightly injured and removed from the game as Meyer scored in the fifth.
Philadelphia 000 010 010—2 8 0
Cleveland 101 213 00x—8 14 0
Christopher, Berry (6); Smith and Hayes.

Lid-lifting and opening of the oven door will cause heat loss which lengthens cooking time and wastes fuel.

GAMES TODAY

New York, June 27 (AP)—Probable pitchers for tomorrow's major league games, with won and lost records in parentheses:

American League
New York at St. Louis, night: Borowy (9-3) vs. Kramer (7-4) or Jakucki (5-5).
Boston at Chicago: Ferriss (10-2) vs. Humphries (2-4).
Philadelphia at Cleveland: Gerkin (6-0) or Knerr (1-4) vs. Bagby (1-7).
Washington at Detroit: Wolff (8-3) vs. Overmire (5-2).

National League
Pittsburgh at New York, night: Strincevich (6-3) vs. Feldman (5-5).
Chicago at Brooklyn: Prim (2-4) or Erickson (2-1) vs. Pfund (3-1) or Herring (1-0).
Cincinnati at Boston: Heusser (5-4) or Dasso (3-4) vs. Tobin (6-8).
St. Louis at Philadelphia: Burkhardt (7-2) vs. Barrett (4-8).

TWO WINS PUT GIANTS IN 3RD

New York, June 27 (AP)—The New York Giants inaugurated a long home stand today by sweeping both ends of a double-header from Pittsburgh, 10-4 and 3-2, to move past the Pirates into third place.

A thrilling three-run rally after two were out in the second contest for the Giants after the Pirates had forced ahead 2-0 on home runs by Lee Handley in the first and Bill Salkeld in the ninth. George Hausmann's double accounted for the tying and winning runs.

The Giants got away to a three-run lead in the opener but the Pirates went ahead with two in the third and fourth. Three Giant singles put them ahead once more in their half of the fourth, a lead they increased with two more in their half of the fourth, a lead they increased with two more in the seventh and three in the eighth.

First game:
Pittsburgh 002 200 000—4 7 0
New York 120 200 23x—10 17 1
Gerheuser, Rescigno and Lopez; Mungo and Lombardi.

Second game:
Pittsburgh 100 000 001—2 6 0
New York 000 000 003—3 11 0
Roe and Salkeld; Brewer and Kluttz.

NINTH INNING DEFEATS CUBS

Brooklyn, June 27 (AP)—The fast stepping Dodgers hammered out a ninth inning 6 to 5 victory over the Chicago Cubs tonight to increase their National league lead over the second place Cardinals to four games.

Luis Olmo broke up the contest with a single that sent Goodie Rosen over the plate. Rosen had walked with one out and moved up a base when Augie Galan also drew a pass.

Score by innings:
Chicago 111 002 000—5 9 2
Brooklyn 040 100 001—6 9 0
Derringer, Erickson and Livingston; Gregg, Buker, Rudolph and Peacock.

Soak such things as greasy overalls in a good soap solution and make it easier for your washing machine to do its job.

Purchase Of Ticket No Privilege For Abuse

By AL VBRMEER

NEA Staff Correspondent

New York.—Leo Durocher, who is usually fast with a mouthful of words, does not like to talk about his recent brush with the law. Leo would like to have the whole thing forgotten. On this point, unfortunately, he does not see eye-to-eye with a certain Dodger fan who insists Durocher crooked him with a fistful of knuckles and, therefore, should be privileged to spend a little time in the Brooklyn bastille.

It is strange the way Dodger fans have responded to this latest fracas involving their frequently-involved manager. These are the noisiest fans in America and some believe even their beloved Lip has no right to freeze their freedom of speech. But there is another group, too, which maintains it is high time somebody did something about the abusive language which gets tossed around ball parks, especially Ebbets Field.

Hunting And Fishing

By Sid Gordon

A LAZY FISHERMAN ON A LAKE

I'm a lazy cuss on a lake. I like to row a boat but not for the exercise. I've had over 50 years of exercise. I like to throw a fly or cast a plug but I've had almost a half century of that and when I go fishing, I want to catch fish.

I want to catch fish as quickly as I can and as often as I can, so I look for short cuts. I take a leaf out of my hunting experiences when I come to a strange lake. When we hunt deer in large territory the first thing we look for is their "sign" upon the ground.

Fish leave no sign but fish, like deer, range in and around their home. In deer hunting, the old timer hunts where the deer are using but he selects the best spot. Where the trees and the brush "pinch" down to a narrow spot, it is there that he takes his stand and watches for deer.

If there are two lakes fairly close together, he knows that, in the narrowest spot of land between the two lakes, the deer will be the most concentrated and his chances are much better. They will come from all directions but the lane of travel is narrowed there.

If a lake sort of "pinches" in the middle, narrows there, a fisherman, who likes to fish but doesn't care about rowing, will work that narrow spot. The fish are more concentrated in the narrows and his chances are better, for one cast will produce as much as five casts in the wider reaches of the lake.

When fish feed in the morning or the evening they leave the plant beds and work along the shoreline to feed upon the smaller fish. He who works the long shoreline with fly or plug should take a short cut if there is a bay in the lake. A bay is a great feeding place.

The mouth of the bay is often much shorter than the long shoreline of the bay. Fishing across the lake from the mouth will produce more fish and easier fishing as the fish cross that line before they scatter all around the shore of the bay to feed, morning or evening.

Another short cut is at the inlet of a good stream. When the fish come to feed in the morning or evening they will not roam all over the delta, the mud flat, but will feed on and near the rim.

After a fisherman has learned to know these places he will have good fishing. Then is the time to put little Willie in the boat and let him take you for a "boat ride" while you search the underwater for a good reef for your daytime fishing. And an outboard motor is a lovely little thing for a lazy fisherman—if he can get one.

300 Hitters In Basketball Real Cage Hot Shots

By WITNEY MARTIN

New York, June 27 (AP)—A 300 hitter in basketball is just about as exceptional as a 300 hitter in baseball, and if a cager can hit 250 consistently he's pretty sure of landing a regular job on almost any team.

Meaning, of course, he's hitting the basket with the ball instead of a ball with a bat. Any kid who can hit the hoop with one-fourth of his shots can consider himself no worse than average.

This rating was determined through a survey made by Howard Hobson, basketball and baseball coach at the University of Oregon. The overall average of shots made in 350 games consistently was 25 per cent, and in only a couple of games did the figure reach more than 40 per cent.

6 Sports Schools

Hobson has just returned from Italy where, as a member of a group of army consultants sent over to give the G-I sports leaders a refresher course in their particular branch of activity, he instructed the basketball instructors.

The group included Ethan Allen, former major league ball player who specialized in baseball; William Cavanagh, West Point boxing instructor; Bill Hargis of Kansas, track tutor; Dean Nesmith of Kansas, physical conditioning; Steward Staley of Illinois, physical education supervisor; George White of New Haven, Conn., officiating; Cecil Isbell of Purdue, football and Maj. Fran Welch of Emporia (Kans.) State teachers, football.

The consultants, in addition to entertaining with sports, quizzes, movies and similar shows, conducted six sports schools in Rome. Leaders chosen from the various service units attended in groups of 60, sopping up information on the conduct of their special branch of endeavor and taking it back to impart to their units.

The athletic officer of the Mediterranean area is Maj. Al Baggett, best remembered as coach of the towering West Texas State Teachers College basketball team, Major Baggett, Hobson reports, has been doing a bang-up job and had 1,200 game teams alone competing in his area.

Getting back to Hobson and his survey, he says a record of Hank Lusetti's shooting was kept over a series of games. Lusetti, it was revealed, hit about one third of his shots. In other words, he is a consistent .333 batter, and as he is about as good as they come in scoring on a basketball court, that percentage must be nearly top.

Hobson says he has noted one marked change in cage play during the war. Before the war a team took on an average 60 shots a game. Now the average is closer to 80 shots.

He attributes this to the fact that coaches nowadays don't have the players under their direction long enough to give them a sound schooling in fundamentals. He believes the situation will correct itself after the war when tutoring returns to normal.

Cards And Phillies Divide Fifty-Fifty

Philadelphia, June 27 (AP)—The world champion St. Louis Cardinals and the Philadelphia Phillies split a two-night twin bill tonight, the home team winning the opener and the visitors taking the second game 6-0.

The Cards turned 13 hits into six runs in the windup while Blix Donnelly held the Phils to a lone safety—a clean single by Vance Dinges after two were out in the second inning.

Vince DiMaggio's bases-loaded homer in the eighth inning of the opener, when the Cards were leading 3-2, put the game on ice for the Phils.

Scores by innings:
St. Louis 200 000 100—3 10 2
Philadelphia 020 000 06x—8 15 0
Wilkes, Jurisich (8); Byerly (8)

First game:
and Rice, O'Dea (8); Sproull, Karl (8) and Mancuso, Seminick (8).

Second game:
St. Louis 002 100 210—6 13 0
Philadelphia 003 000 000—0 1 0
Donnelly and O'Dea; Leon, Judd and Seminick.

Lake Leads Boston To 11-9 Triumph Over Chicago Sox

Chicago, June 27 (AP)—A pinch single by the veteran Dolph Camilla, followed by Eddie Lake's fourth hit of the game, drove in two runs in the ninth inning to give the Boston Red Sox an 11-9 victory over the Chicago White Sox in the first of a three-game series before 16,684 tonight.

Lake, who led the Boston hitting attack, opened the game with a homer into the left field bleachers his fifth round-tripper of the season. Tom McBride hit a three-run homer for the Red Sox in the fifth.

Clen Hausmann, who came to the relief of Dennis O'Neill in the fourth, got credit for his fifth win of the year.

Boston 101 231 003—11 17 2
Chicago 030 201 030—9 11 1
O'Neill, Hausmann, C. Barrett and Garbark, Walters, Grove, Ross, Caldwell and Tresh.

33 INDUCTED AT MARQUETTE

Army Gets 29 Men From
Delta County; Navy
Takes Four

Twenty-seven Delta county se-
lectees were accepted for general
military service in the U. S. Army
at the Marquette induction station
this week and two were accepted
for limited service. Four men
were accepted for the Navy.

The men selected for the army
general service are:

Floyd Wellington Pomeroy,
George Marion Russell, Stanley
Joseph Moser, Edward Clarence
Brown, Wayne Wm. Sundelius,
Richard Fisher, Robert John Mi-
cheau, Melvin John Micheau,
Francis Joseph Lynch, Ronald
Edwin Gilding, Francis X. Cor-
bett, Donald John Pepin.

Edwin Robert Erickson, Gerald
Joseph Lafontaine, Donald Dwight
McMartin, Robert William Pear-
son, John Daigneault, Melvin A.
Gabrielson, William John Gas-
man, Frank A. DeCook, Raymond
Joseph Moran, Percy Junior Stof-
fel, William Johnson, James Pat-
rick Tobin, William Edward Gir-
ard, Lawrence John Paddock and
Donald Joseph Moreau.

Melvin Edward Anderson and
Merlin Edmond Godfrey were
accepted for military service only
(not general military service).

Ray Louis Rose, William Allen
DuFour, Alvin Clarence Steede
and Thomas X. Quinn were ac-
cepted for the navy.

Hospital

Mrs. Laura McCann, 201 North
Eleventh street, has submitted to
an operation for appendicitis at
St. Francis hospital.

Victor Benetti, of Hermansville,
sustained fractures of the left
arm, left and right heels in a fall
recently and is a patient at St.
Francis hospital.

Miss Carol DeMarse, daughter
of Mr. and Mrs. Richard DeMarse,
who recently underwent an ap-
pendix operation at St. Fran-
cise hospital, is now permitted visitors.

Periodic Malaria Epidemics Linked With Rain Cycles

Columbus, Ohio—Malaria epidemics,
recurring at intervals of 10 or
12 years, very probably had a
good deal to do with the decay of
the ancient high civilization of
that region, Dr. Helmut de Terra,
now at the University of Ohio,
declares in a report in the journal,
Science. This recurrence of epi-
demics he believes is a result of a
cycle recurrence in wet years,
making for an abundance of the
mosquitoes that carry malaria
germs. He further points out a
rough correspondence between the
wet years and the 11-year major
sunspot period.

Several factors help to aggra-
vate the mosquito-breeding situa-
tion in wet years, Dr. de Terra
suggests. The wet years tend to
come immediately after one or
two exceptionally dry ones. Dur-
ing the dry years, weathered rock
fragments and other debris tend
to pile up in stream courses where
there is no water to keep them
washed out. Then, when the
rains come, there is excessive
ponding, greatly increasing the
potential breeding areas.

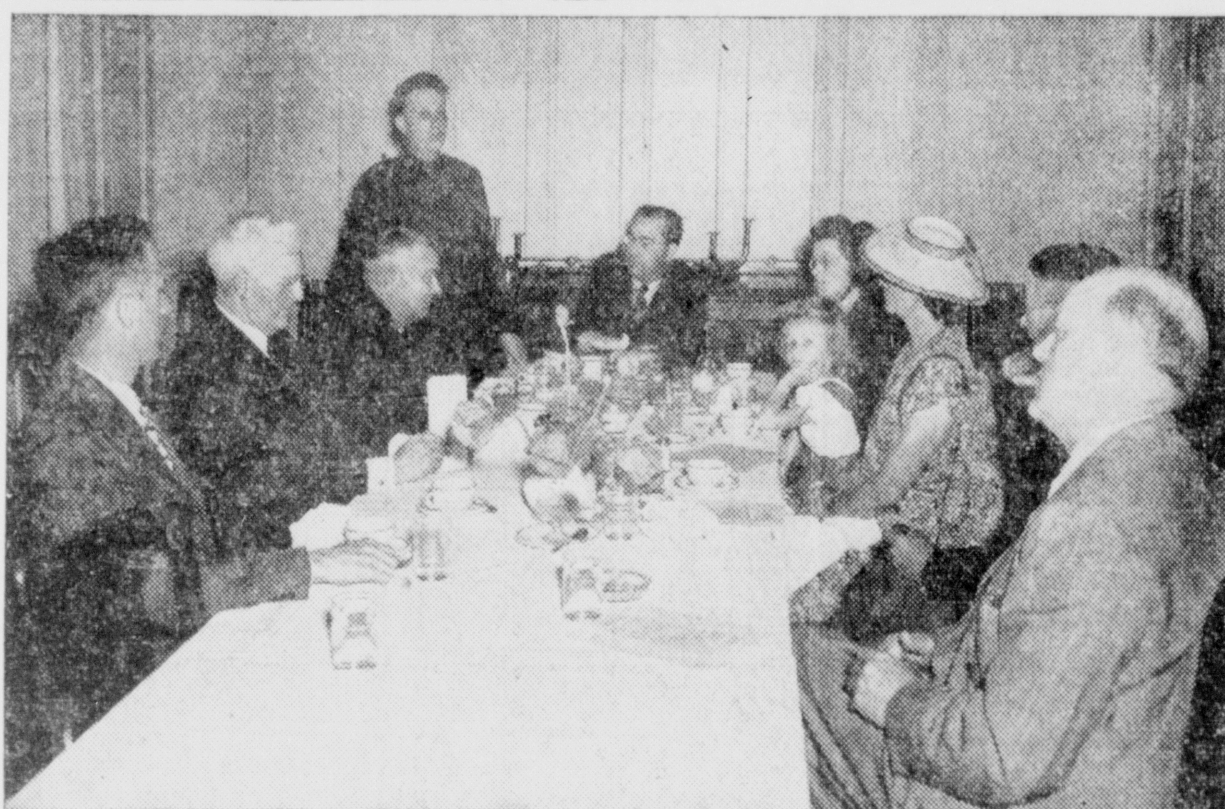

Furthermore, the "lean years"
of drought are naturally years of
food shortage. The wandering
desert Arabs drift into the settled
areas near the streams, hunting
for food. So when the wet years
bring their sudden great increases
in the numbers of malaria-carry-
ing mosquitoes, there are unusual
numbers of human victims and
malaria carriers awaiting them.

"Able's Irish Rose" has been
played in Swedish, Portuguese,
Spanish, French, and German.

son, in charge of the Salvation Army here the past
two years, delivered his final report to the local
advisory board at a meeting held at the Delta
hotel this week. Left to right are John A. Lemmer,
William J. Miller, M. F. Ettenhofer, Captain An-

derson Wm. J. Duchaine, Mrs. Anderson, daughter,
Marilyn, Mrs. John Luecke, Harry D. Brackett and
Juel Lee, Captain and Mrs. Anderson will leave
next week to assume charge of the Austin head-
quarters of the Salvation Army in Chicago.

SHORTAGE OF DOCTORS SEEN

Dr. Fishbein Forecasts
Menace To Public
Health

Chicago, (AP)—Dr. Morris Fish-
bein of the American Medical As-
sociation asserted that an "in-
adequate supply" of medical stud-
ents is a "danger to the public
health" and by 1946 may result
in a "diminishing medical profes-
sion."

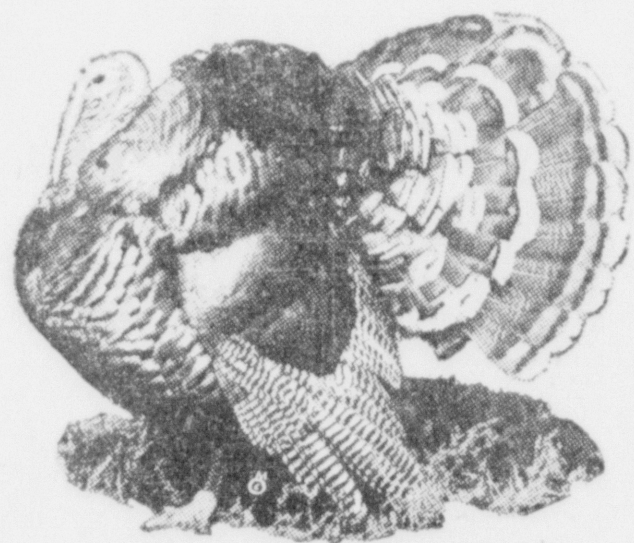

Dr. Fishbein, editor of the jour-
nal of the A. M. A., declared in an
address prepared for delivery be-
fore the Chicago medical society.
"At this very moment our gov-
ernment has not been sufficiently
intelligent to recognize the danger
to the public health that is in-
herent in an inadequate supply of
students for schools of medicine."

"Unless Congress takes prompt
action on the bills submitted by
Senator Ellender of Louisiana or
unless the selective service system
exercises powers already granted
to it under the selective service
act to defer men pursuing courses
of premedical studies, we shall
see, beginning in 1946, a diminish-
ing medical profession at a time
when medicine not only in the
United States but in all the world
is calling hungrily for well trained
men."

"Even by the most casual of es-
timates, we shall require contin-
uously for government agencies far
greater numbers of physicians
than were ever needed before."

mates would indicate 5,000 physi-
cians for the army, 2,000 for the
navy, 10,000 for the veterans ad-
ministration, 3,000 for the U. S.
public health service and 3,000
for services in occupied areas
abroad—a total of 23,000 physi-
cians unavailable to the care of
our civilian population."

Beaver Dam Noted For Brick Cheese

Beaver Dam, Wis.—This thriving
city, known as the "Brick
Cheese Center of America," is the
site of one of Wisconsin's largest
springs, once considered a sacred
spring by the Winnebago Indians.
Many Indian relics are retained in
Swan park, which surrounds the
spring.

"Sold the first day" said Jones.
